MRM Digital Community Platform

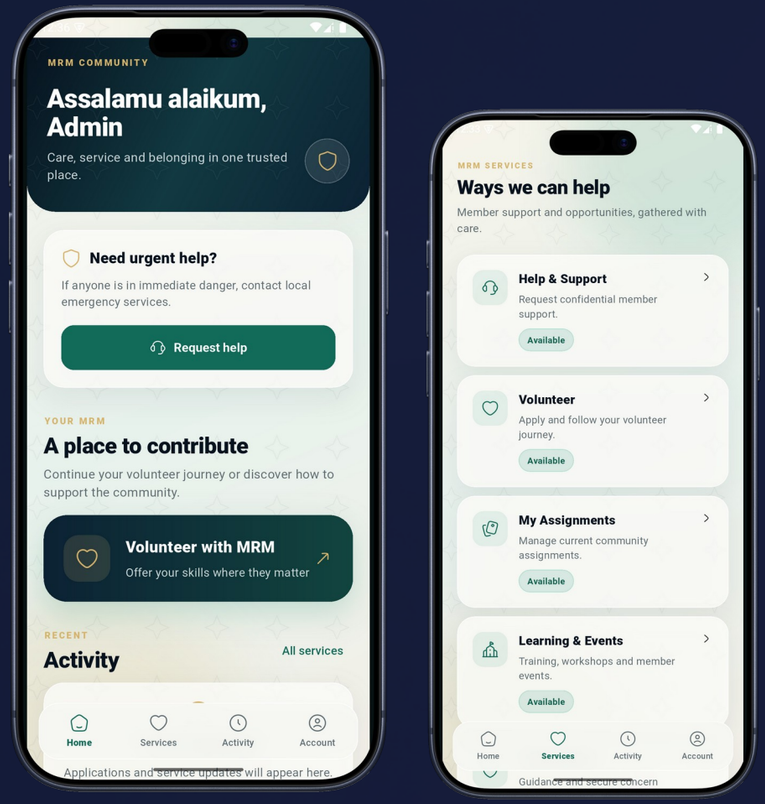

Faith, learning and community care for all Muslims.

Bismillahirrahmanirrahim

One community.
Connected through care.

Daily Islamic tools, trusted learning and coordinated assistance, with dedicated support for reverts and people who need it.

ANDROID + iOS | PUBLIC WEBSITE | MRM OPERATIONS

Built for the wider Muslim community

Universal daily value, with focused services where additional support is needed.

Everyday faith

Prayer, Quran, Qibla and remembrance give Muslims a reason to return throughout the week.

Lifelong learning

Approved teachers, live classes and recorded resources connect learners with trusted content.

Community care

Members seek help, volunteers contribute and MRM coordinates safe follow-up.

Revert support remains a core MRM service. It sits within a platform that welcomes all Muslims.

Audience → daily use → learning → participation → coordinated support

One platform, clearly defined roles

An account can hold more than one authorised role; access follows the role and the individual record.

Muslim users

Use daily tools and approved learning; register where a personal service requires an account.

Members / support seekers

Submit requests, choose safe contact preferences and follow their own case updates.

Volunteer applicants

Apply, supply evidence and attend an interview before restricted service access.

Approved volunteers

Receive eligible work, manage assigned service and view verified recognition.

Approved teachers

Submit learning and advertisements; subscriptions govern designated publishing privileges.

MRM staff

Verify, triage, safeguard, moderate and administer within duty-based permissions.

Discover freely • Authenticate for personal records • Approve before privileged access

Explore the complete platform

Click a section card in PowerPoint or the PDF to jump to its opening page.

01 Experience

Pages 05–12

Ecosystem, features, app navigation and current mobile screens.

02 Care & volunteering

Pages 13–23

Assistance, verification, safe discovery, private cases and zakat referrals.

03 Learning & revenue

Pages 24–31

Teachers, subscription flows, classes, sponsors and website journeys.

04 Islamic utilities

Pages 32–41

Prayer, Qibla, Quran, remembrance, calendar and content administration.

05 MRM operations

Pages 42–47

Dashboard, accounts, configuration, policies, reports and security.

06 Delivery & evidence

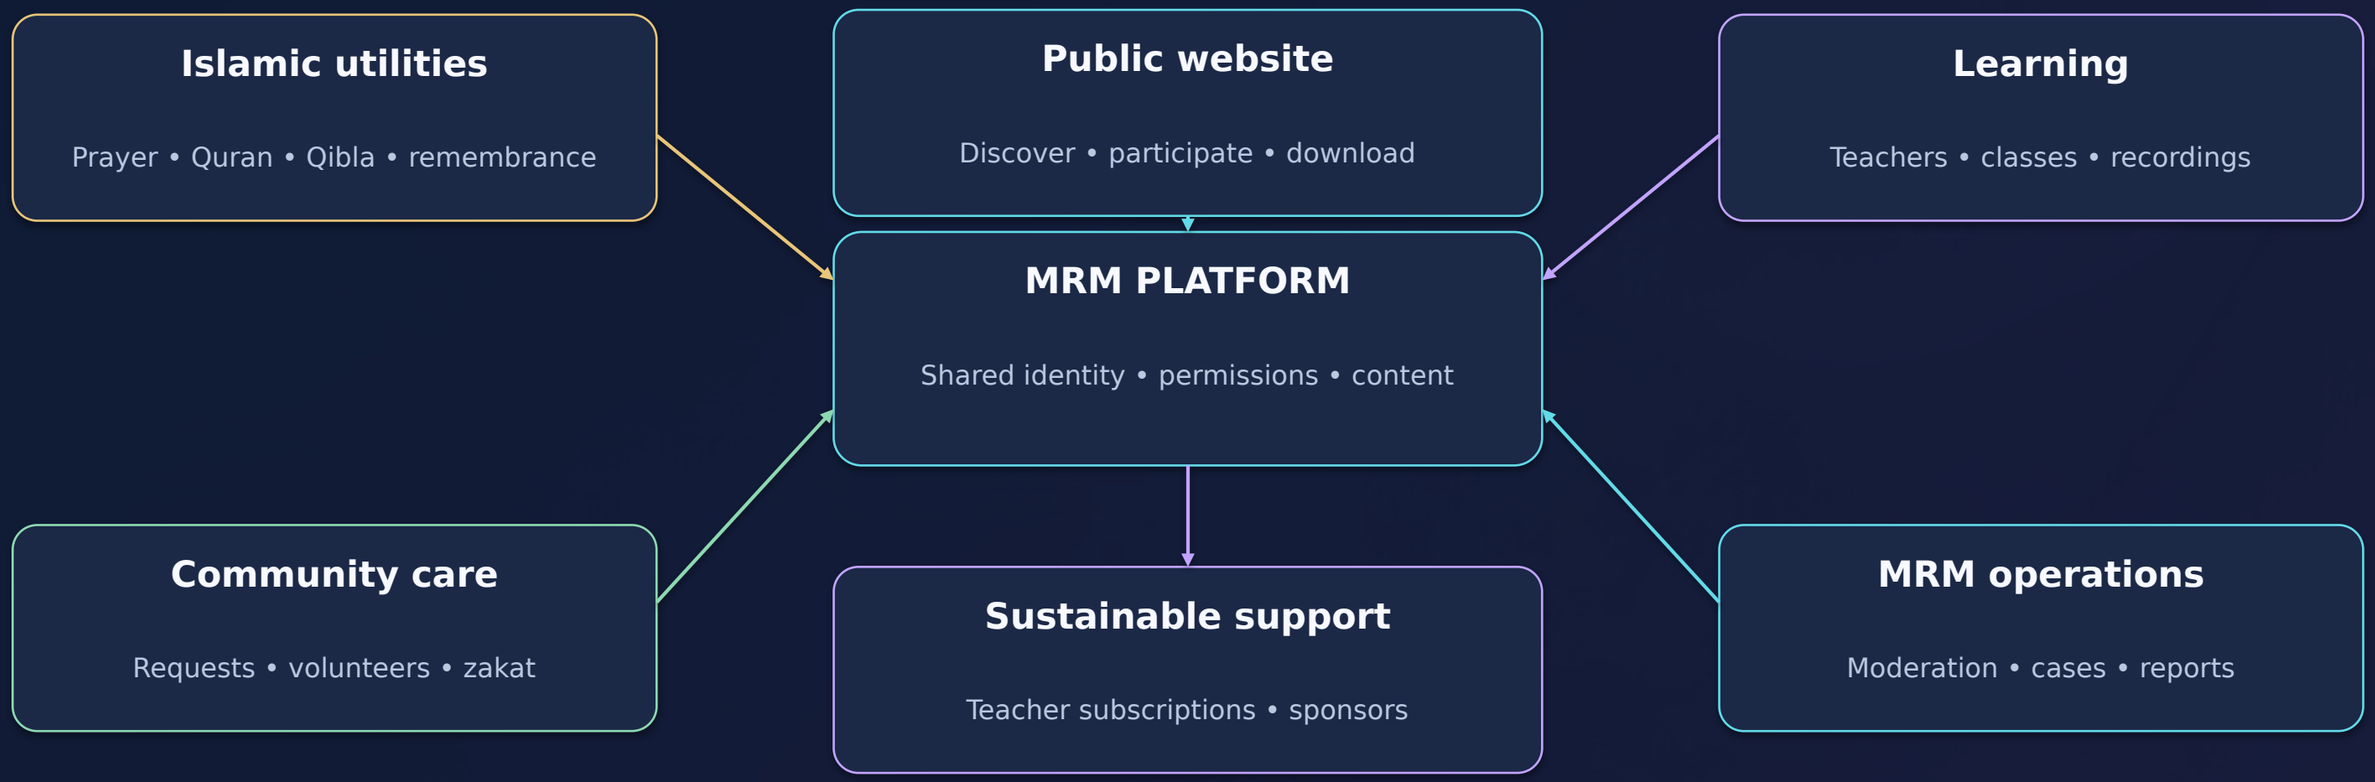

Pages 48–50

Milestones, screen coverage and acceptance responsibilities.

Every page footer returns to this contents page. Feature chips link related journeys.

How every feature connects

Shared identity, content and permissions connect public discovery, daily use and community service.

Public information supports discovery; private records remain within authorised service journeys.

Complete feature landscape

The proposed service scope and the supplied template functions are shown with their distinct purposes.

Daily Islamic practice

Prayer times • Qibla • Quran • dua • dhikr
Hadith • Hijri/Ramadan • nearby mosques
Informational zakat estimate

Assistance & volunteering

Requests • alerts • assignment • case tracking
Evidence review • online interview • discovery
Gender access • ranks • safeguarding

Teachers & learning

Teacher approval • posts • teaching ads
Teacher-only plans • verified entitlements
Live sessions • recordings • classes/events

Zakat & confidential support

Private faith/family intake • restricted staff
Consent • review • referral • follow-up
Authority-controlled eligibility/disbursement

Public engagement & sponsors

Website • participation routes • content
Sponsor profiles • scheduled placements
Recognition • aggregate performance

Operations & template library

Accounts • permissions • audit • reports
Categories • Sifat Names • Haram Codes
Existing donation/payment configuration

Marketplace excluded • Core participation stays free • Template-only functions are labelled on pages 40–41

A connected app journey

Navigation keeps daily use, personal service and role-specific work within one coherent experience.

01

Open the app

Daily tools and approved public resources.

02

Choose a purpose

Learn, seek support or contribute.

03

Use the right access

Sign in; verified roles unlock relevant work.

04

Follow progress

Requests, applications and learning updates.

Home

Daily value and service entry points

Services

Assistance, volunteering and learning

My account

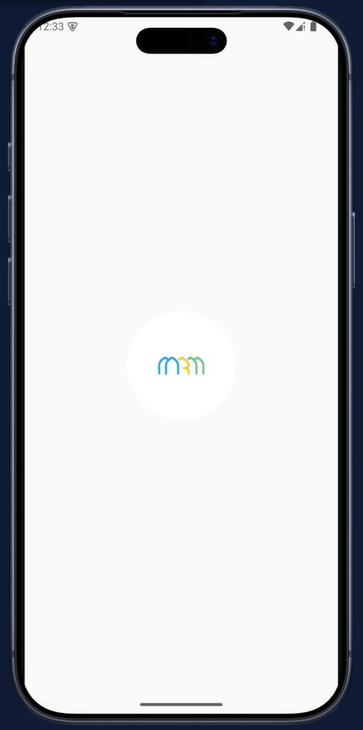

Preferences and authorised role journeys

Daily tools ↔ learning • Services ↔ personal activity • Role changes ↔ authorised access

Entry, identity and session access

Brand introduction and authentication are separate stages in the user journey.

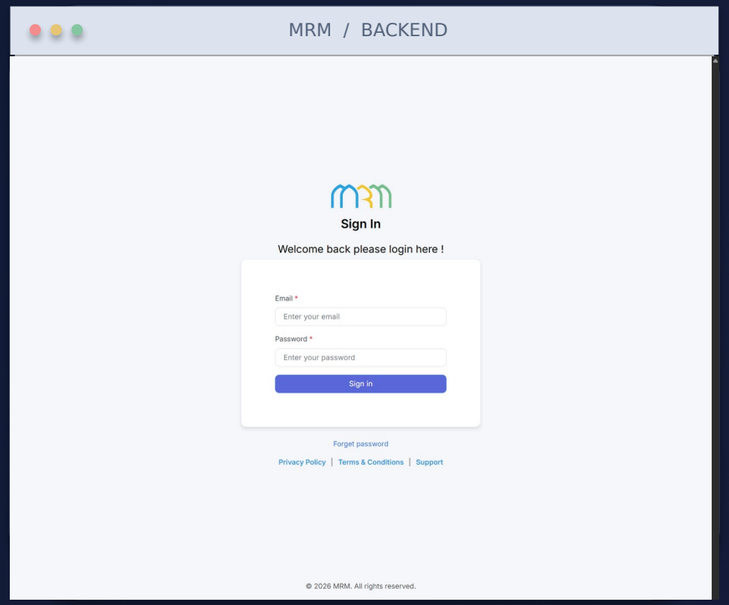

Account › 12

Capture 01 · logo / splash

Capture 02 · loading state

Provided administration sign-in screen

Personal access

Contact verification and recovery support personal records. Consent, location and notification choices remain explicit.

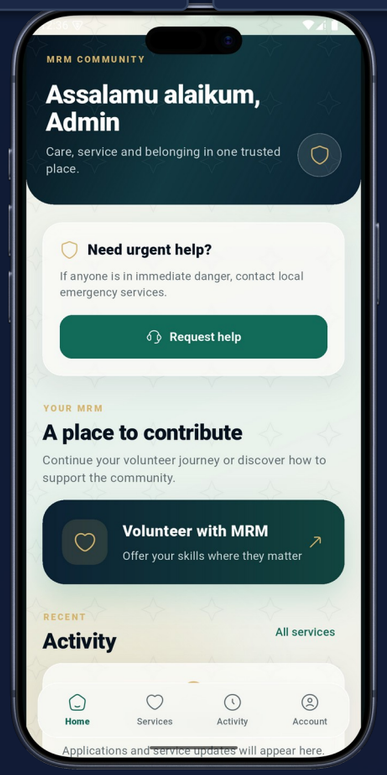

These mobile captures show entry states, not a completed sign-in form.

Identity → account → role eligibility → permitted records

Home: a clear route to participate

The loaded home capture combines a welcome, help entry point, volunteer participation and recent activity.

Assistance › 13 **Daily tools › 32**

Provided loaded home screen

Daily value

Connect Islamic tools and learning to recurring use.

Request assistance

Open a safe intake route and follow your own case.

Volunteer with MRM

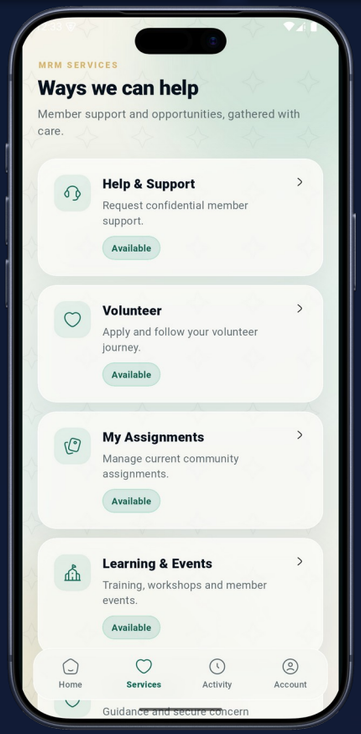

Apply, verify and contribute to suitable service.

Home → daily tools [32] • Home → requests [13] • Home → volunteer onboarding [15]

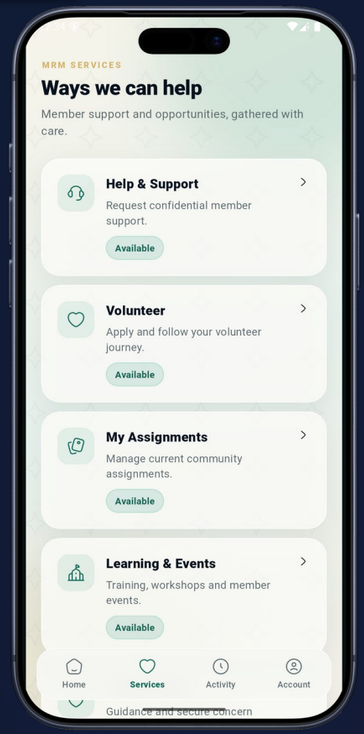

Services: clear paths into community care

The supplied service captures show help, volunteering, assignments and learning entry points.

Volunteer › 15 **Learning › 24**

Capture 03 · service hub

Capture 06 · same hub state

Help & support

Private intake with triage and controlled follow-up.

Volunteer & assignments

Verification precedes eligible work and assigned access.

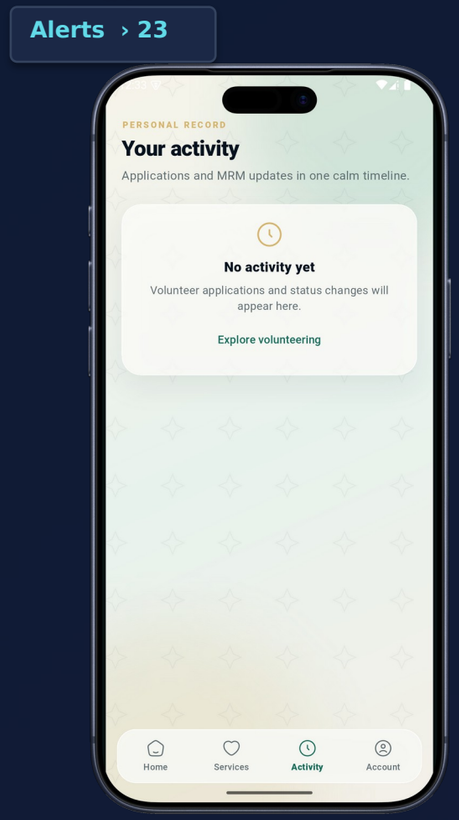

Learning & events

Discover approved programmes and participation details.

A service-menu capture does not demonstrate the request form, assignment detail or learning flow.

Activity: a personal service timeline

The current capture is an empty state; the proposed journey connects it to meaningful updates.

Provided activity screen · empty state

Requests & referrals

Acknowledgement, assignment changes and referral progress visible to the person concerned.

Applications & service

Verification outcomes and authorised assignment updates with a clear next action.

Learning updates

Class reminders and relevant publication updates link to approved content.

Controlled notifications

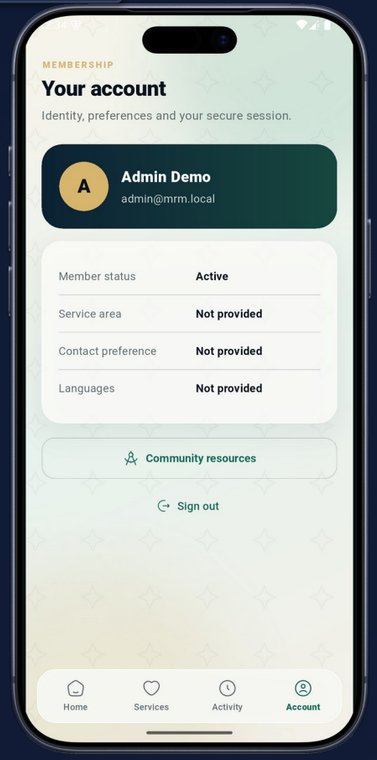

Open the app for details; sensitive descriptions stay out of lock-screen alerts.

Event → authorised recipient → notification → relevant detail → updated personal timeline

Account: identity, preferences and permissions

Account settings support safe participation without conflating membership, approval and paid entitlement.

Roles › 43

Provided demo account screen

Member preferences

Service area, language and safe contact preferences inform support.

Consent & permissions

Location and notifications are separate choices; allow manual area selection.

Authorised roles

MRM approves roles. Subscription entitlement never grants staff access.

Account identity ≠ volunteer approval ≠ teacher approval ≠ subscription entitlement

Assistance: from request to resolution

The service is coordinated by MRM, with limited alerts and private details shared only when authorised.

01

Submit

Category, safe description, urgency and approximate area.

02

Triage

MRM reviews need, sensitivity and eligibility.

03

Offer

Suitable approved volunteers receive limited alerts.

04

Assign

Seeker or coordinator confirms the assignment.

05

Resolve

Progress, feedback, follow-up and closure.

Member control

Stop contact, request reassignment or report a concern.

Coordinator control

Review unanswered work and record accountable decisions.

Request → eligible match → confirmed assignment → progress → closure → verified recognition [21]

Matching: eligibility before assignment

Category, service area, language, availability and access rules determine who can receive an offer.

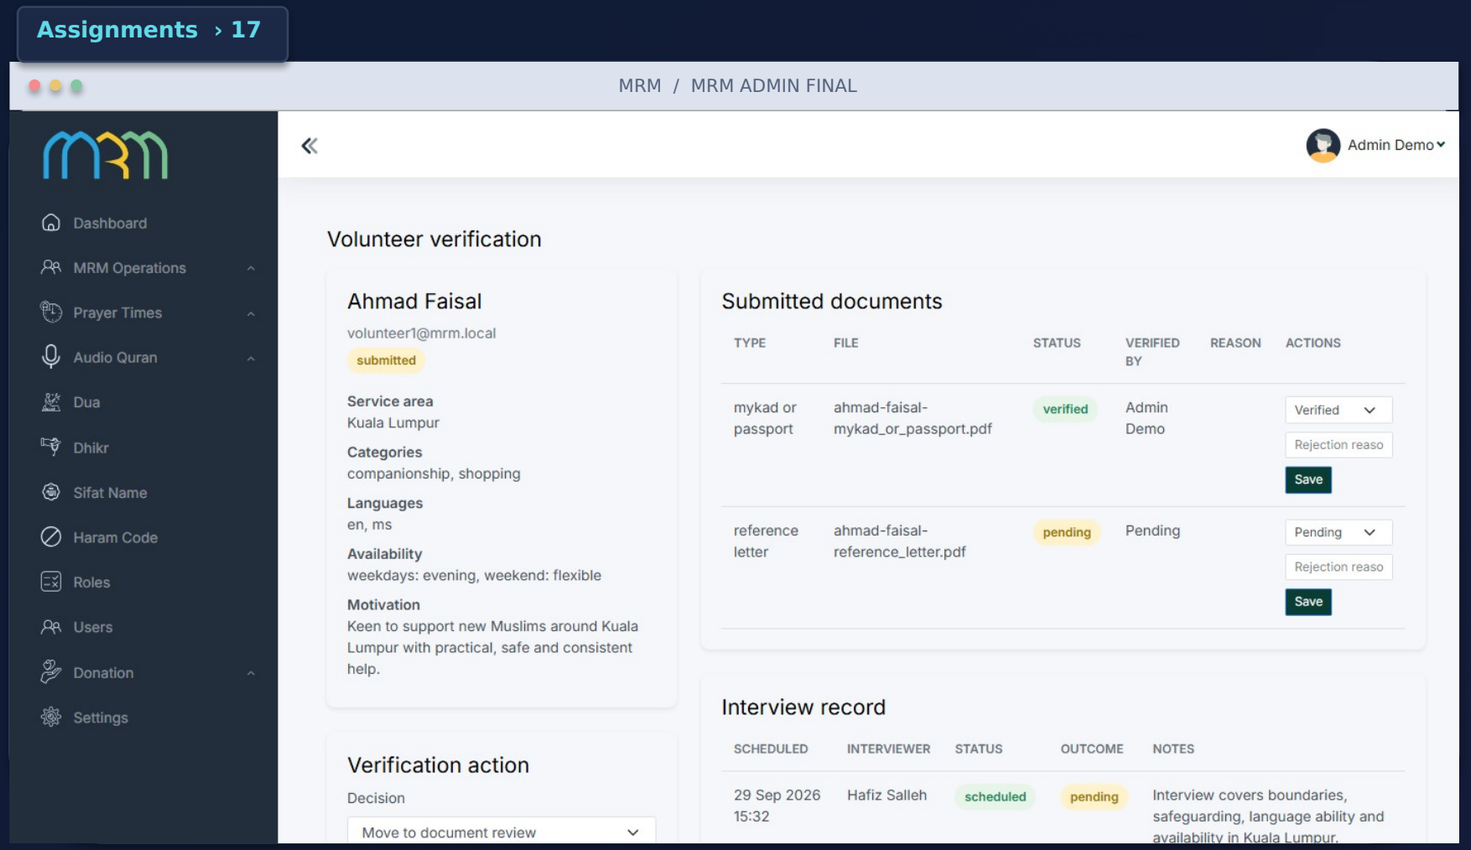

Access is checked before a notification or case record is disclosed.

Sensitive cases use the restricted staff route [18], rather than routine volunteer matching.

Volunteer approval is a complete workflow

Application, evidence review and online interview precede approval for service.

Provided demo capture · top viewport; full capture in screenbook

Apply & provide evidence

Skills, languages, service area, availability and MRM-required documents.

Review & interview

Staff examine documents and record an online interview; request clarification when needed.

Approve, decline or suspend

Only approved active volunteers receive eligible new work. Decisions retain a reason and history.

Applicant → document review → online interview → MRM decision → eligible service [17]

Nearby discovery, with privacy boundaries

Approved volunteer discovery uses approximate areas and server-enforced visibility rules.

01

Choose an area

Location permission or manual service-area selection.

02

Filter eligible profiles

Approved, active and permitted under MRM gender rules.

03

View permitted detail

General area, skills and approved profile fields.

04

Take a safe action

Permitted contact or a coordinated service request.

Gender visibility

Male and female profiles remain separated in the agreed discovery/contact scope.

Controlled exceptions

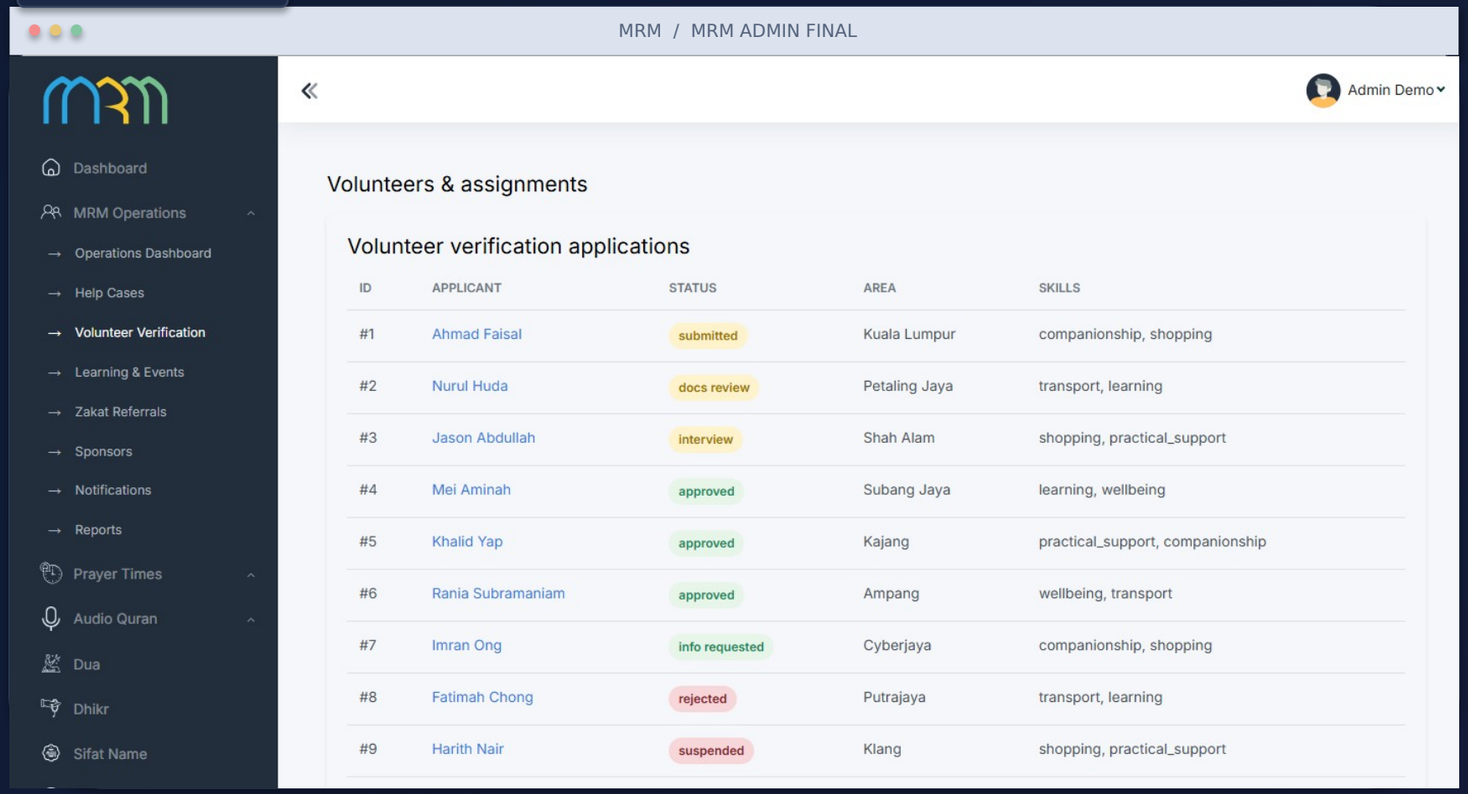

MRM defines staff/teacher exceptions before enabling them.

Apply rules to search, map markers, detail routes, notifications and direct API requests.

Assignments: controlled service delivery

Offers and assignments connect verified volunteers to suitable requests and accountable progress.

Recognition › 21

Provided demo capture · top viewport; full capture in screenbook

Offer is not assignment

A volunteer response becomes service access only after confirmation.

Assigned access

Permitted case details support contact, progress updates and completion.

Changes stay accountable

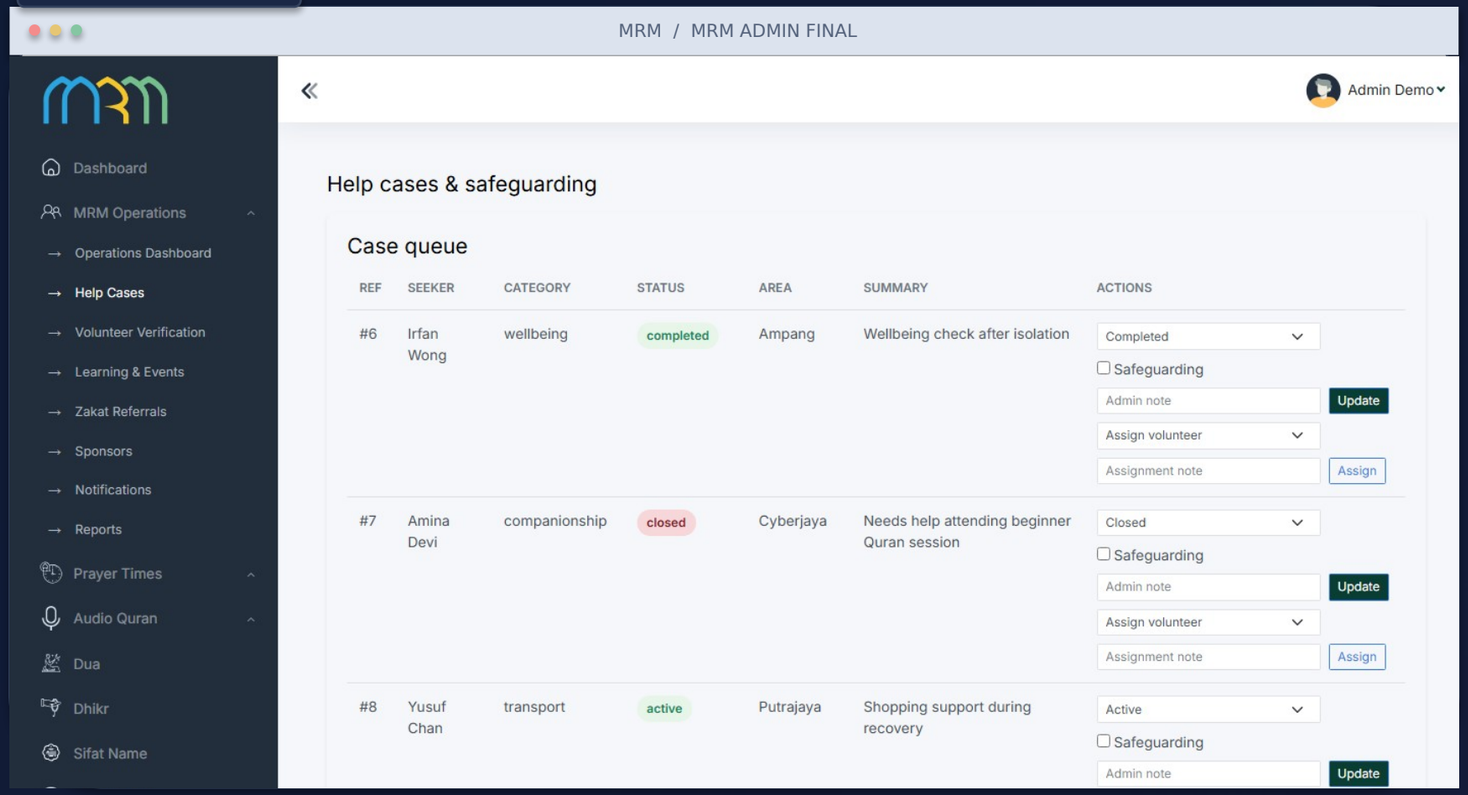

Reassignment, cancellation and suspension return affected work to staff review.

Verified volunteer [15] → eligible offer [14] → assignment → outcome → service credit [21]

Private cases require a restricted route

Confidential faith and family concerns are handled by designated MRM personnel.

Safeguarding › 19

Provided demo capture · top viewport; full capture in screenbook

Confidential intake

The person chooses safe contact details and submits the concern privately.

Designated staff review

Restricted queues, adviser assignment and controlled follow-up protect case information.

Responsible closure

Record outcome or referral under MRM policy; no automated religious judgement.

Private intake → designated staff → authorised follow-up → controlled closure / referral

Safeguarding: clear escalation and user control

The platform supports coordination while MRM defines coverage, response procedures and escalation contacts.

Concern reported

Danger, misconduct or contact concern

→

Assess and restrict

Designated staff review; protect records

→

Follow up and record action

Escalation, account restriction or case reassignment

Immediate danger

Show clear emergency contact guidance. The application does not guarantee emergency response.

Personal control

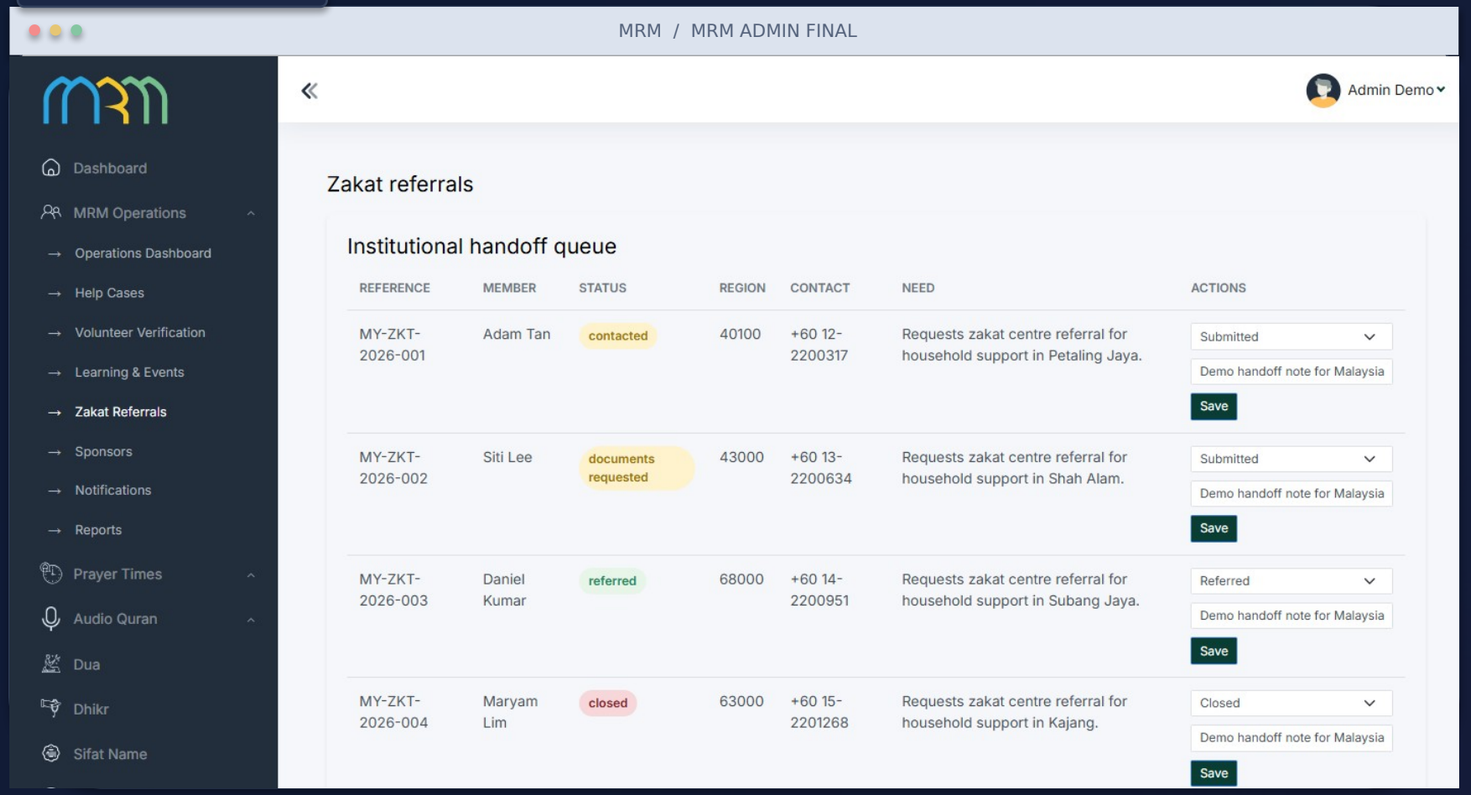

A member can stop contact, report behaviour or request reassignment without public exposure.

MRM supplies incident classifications, response hours, authorised staff and escalation contacts.

Zakat assistance: referral, not an eligibility decision

Consent, review and institutional handoff connect members to the relevant zakat authority.

Zakat estimate › 40

Provided demo capture · top viewport; full capture in screenbook

Submit with consent

Need, region and safe contact preference enter the MRM review queue.

Coordinate referral

Record recipient, reference, authorised sharing and partner follow-up.

Authority decision

Eligibility, approval and disbursement remain with the zakat authority. API access is conditional.

Enquiry → review → referral → partner response → closure • No zakat collection/disbursement included

Recognition follows verified contribution

Badges and ranks acknowledge service without overriding safeguarding or access permissions.

01

Record service

Assignment outcome, approved event or training.

02

Verify contribution

Coordinator or permitted confirming party validates credit.

03

Apply MRM criteria

Configured thresholds, award basis and eligibility.

04

Recognise

Show badges and service summary without beneficiary details.

Correction & appeal

Staff can correct or revoke credit and retain the reason.

Safe incentives

No sensitive-case priority from rank; no reward for risk or speed alone.

Assignments [17] + verified participation [29] → contribution history → recognition

The volunteer participation loop

A sustainable service connects preparation, suitable work, support and recognition.

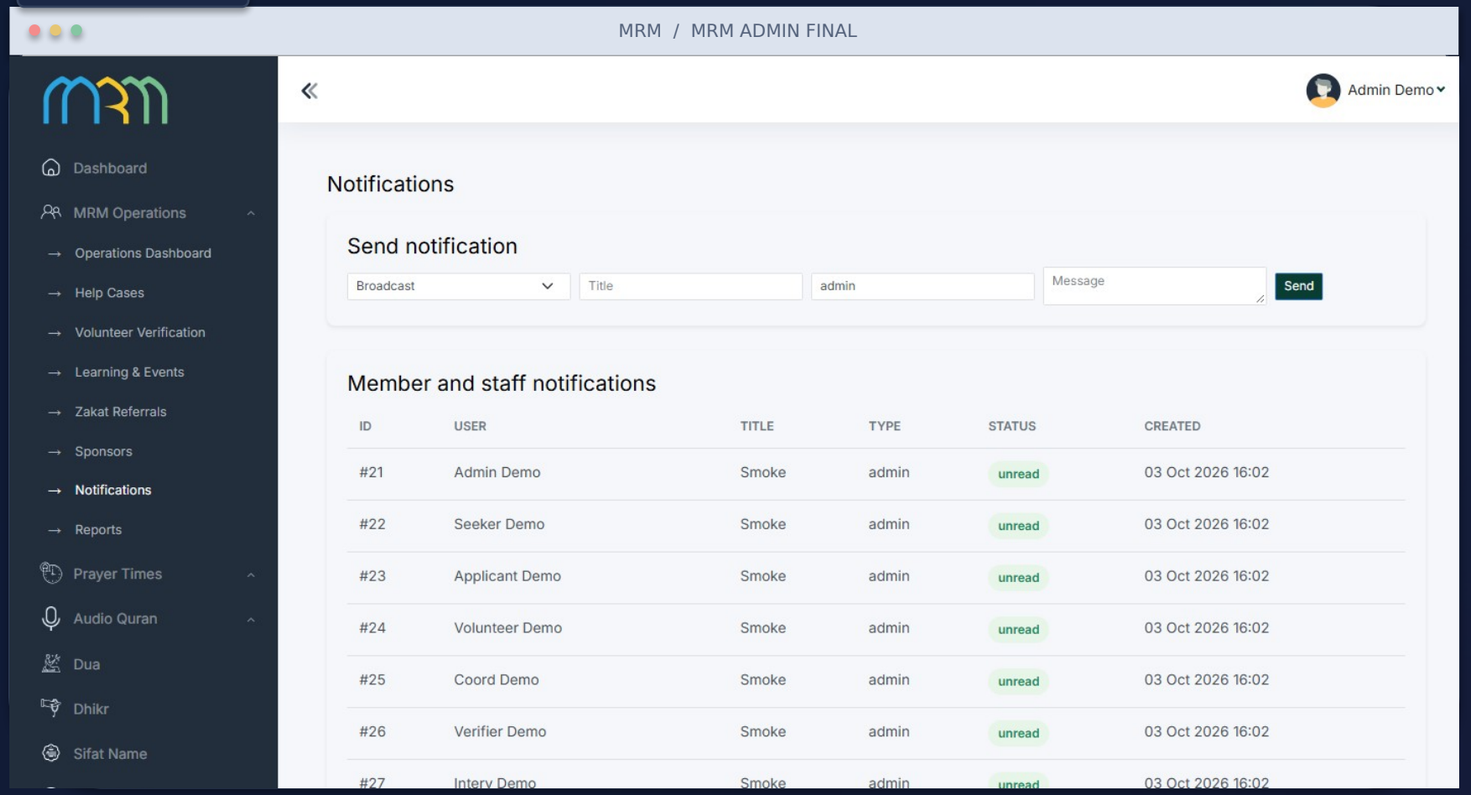

Availability and approval remain current; suspension immediately withholds eligible new work.

Notifications connect people to the next action

Alerts are role-aware and privacy-safe, with relevant detail opened inside the app.

Activity › 11

Provided demo capture · top viewport; full capture in screenbook

Relevant triggers

Eligible request offers, assignment changes, class reminders and application updates.

Safe payloads

Use approximate areas and limited summaries. Keep sensitive descriptions off lock screens.

Accountable delivery

Record send status, respect preferences and return unattended cases to staff follow-up.

Service event → eligibility check → safe alert → authorised detail → activity update [11]

Learning for every Muslim

Approved programmes connect discovery, participation and continued learning.

01

Discover

Browse by topic, language, teacher and programme.

02

Understand

View schedule, access rules and approved details.

03

Participate

Register where required and open the live session.

04

Continue

Use approved recordings and relevant resources.

Trusted publication

MRM approves religious material and teacher permissions.

Daily practice connection

Learning links to Quran, dua, prayer guidance and approved resources.

Approved teacher [25] → moderated content [26] → programme [29] → member participation

Teachers: approval before publishing

Teaching opportunities are governed by credentials, moderation and appropriate entitlements.

01

Apply

Profile, subjects, languages, experience and evidence.

02

Review

MRM examines credentials and requests clarification.

03

Approve

Teacher role enables a permitted workspace.

04

Enable privileges

Applicable plan controls designated publishing.

05

Moderate

Submitted material is reviewed before publication.

Professional presence

Approved profile and teaching opportunities connect learners to teachers.

Role boundary

Teacher approval or payment never provides private support-case access.

Teacher approval and payment entitlement are separate checks; neither substitutes for moderation.

Teaching opportunities and moderated content

Teachers submit educational material and clearly identified teaching advertisements.

Educational posts

Approved articles and posts organised by subject and language.

Teaching advertisements

Teacher, offer, approved media and a clear enquiry route in learning areas.

Classes & recordings

Proposed programmes and lessons enter MRM’s review queue.

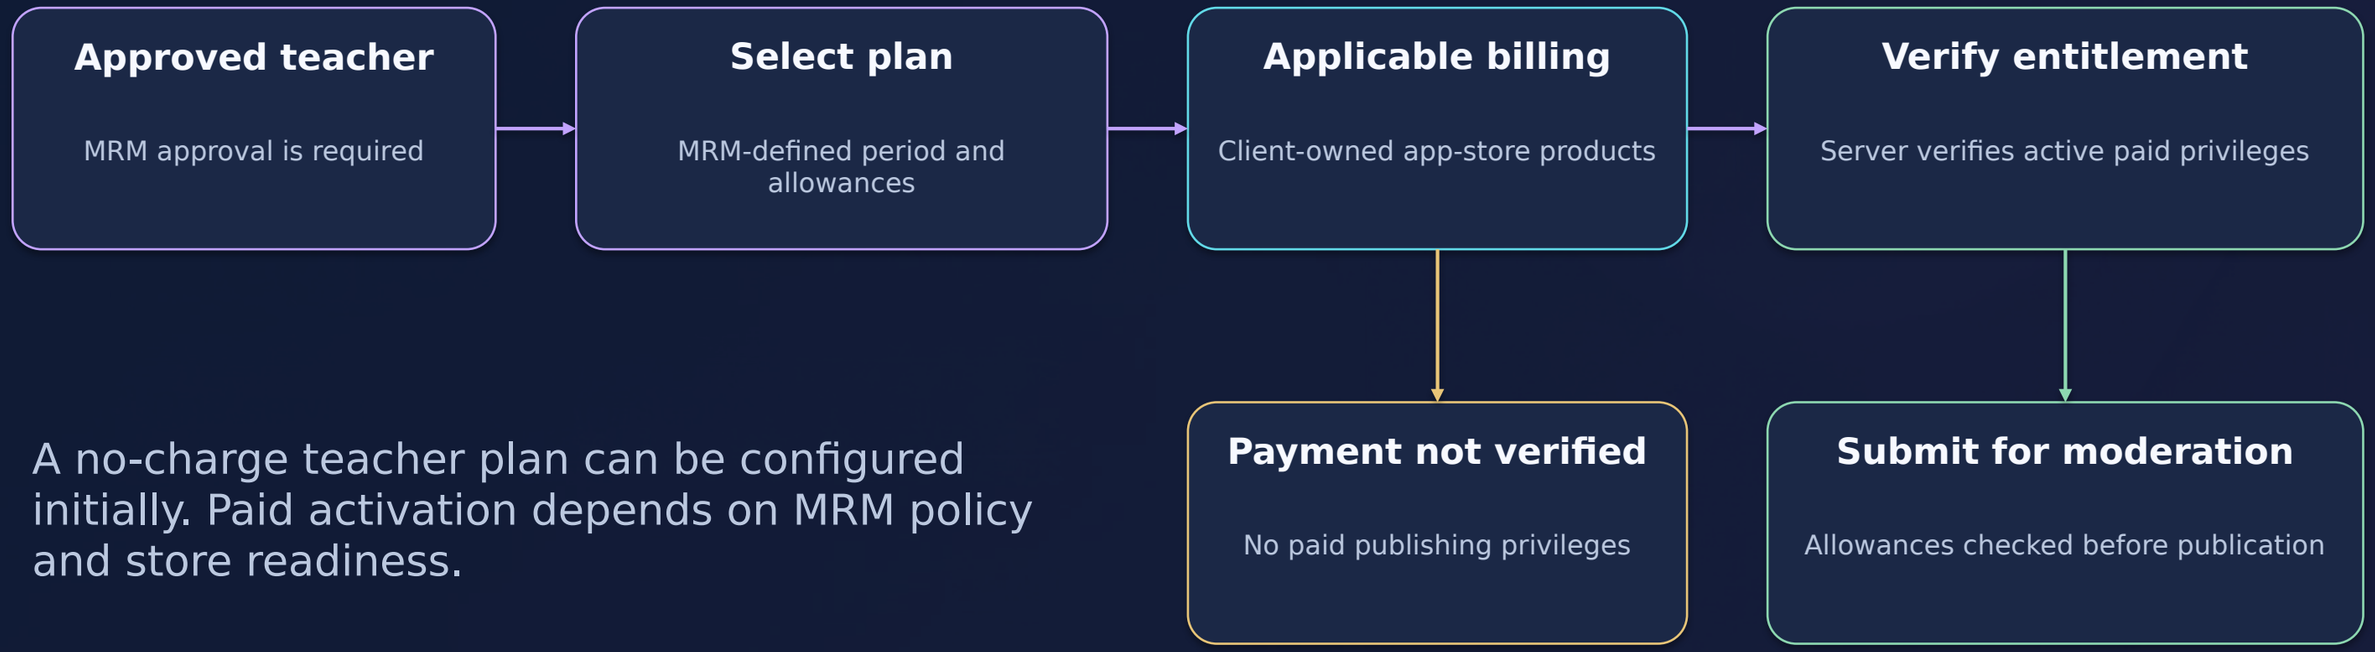

Publication control

Approve, return, schedule, reject, withdraw or archive with recorded outcomes.

Submit → review → revise if needed → publish → monitor • No teacher ads in private case screens

Teacher subscriptions: approval, payment, entitlement

Only approved teachers use paid publishing plans. Member assistance and volunteering remain free.

A no-charge teacher plan can be configured initially. Paid activation depends on MRM policy and store readiness.

Teacher approval → plan → verified entitlement → allowance checks → content moderation → publication

Subscription lifecycle: clear states and recovery

Renewal, cancellation, failed payment and expiry require visible outcomes and verified entitlement.

01

Active

Publishing within plan allowances; show status and renewal.

02

Renew / cancel

Use applicable store management and confirmation.

03

Verify changes

Process payment, cancellation and expiry updates.

04

Apply entitlement

Pause paid privileges when entitlement ends.

Restore eligible purchases

Reconnect a permitted purchase to the approved teacher account.

Preserve history

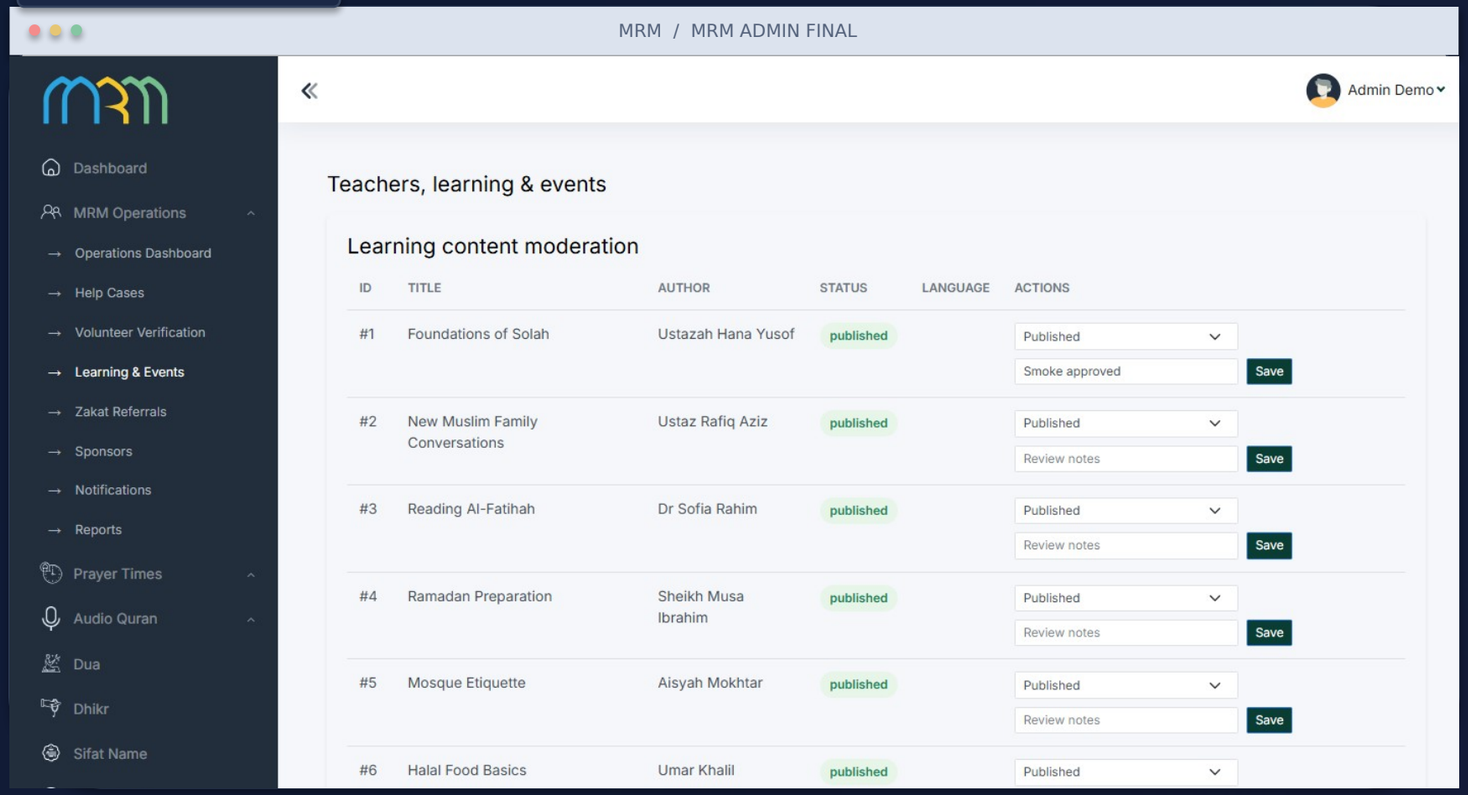

Keep the account and approved historical content; confirm visibility policy before launch.

Plan prices and allowances are configured by MRM; the deck does not invent subscription tiers or prices.

Classes, events and approved recordings

Live sessions and recorded resources are connected through moderated programme information.

Learner journey › 24

Provided demo capture · top viewport; full capture in screenbook

Prepare programme

Subject, teacher, language, schedule, access rules and approved media.

Review & publish

MRM approves content and rights before users browse or register.

Attend & revisit

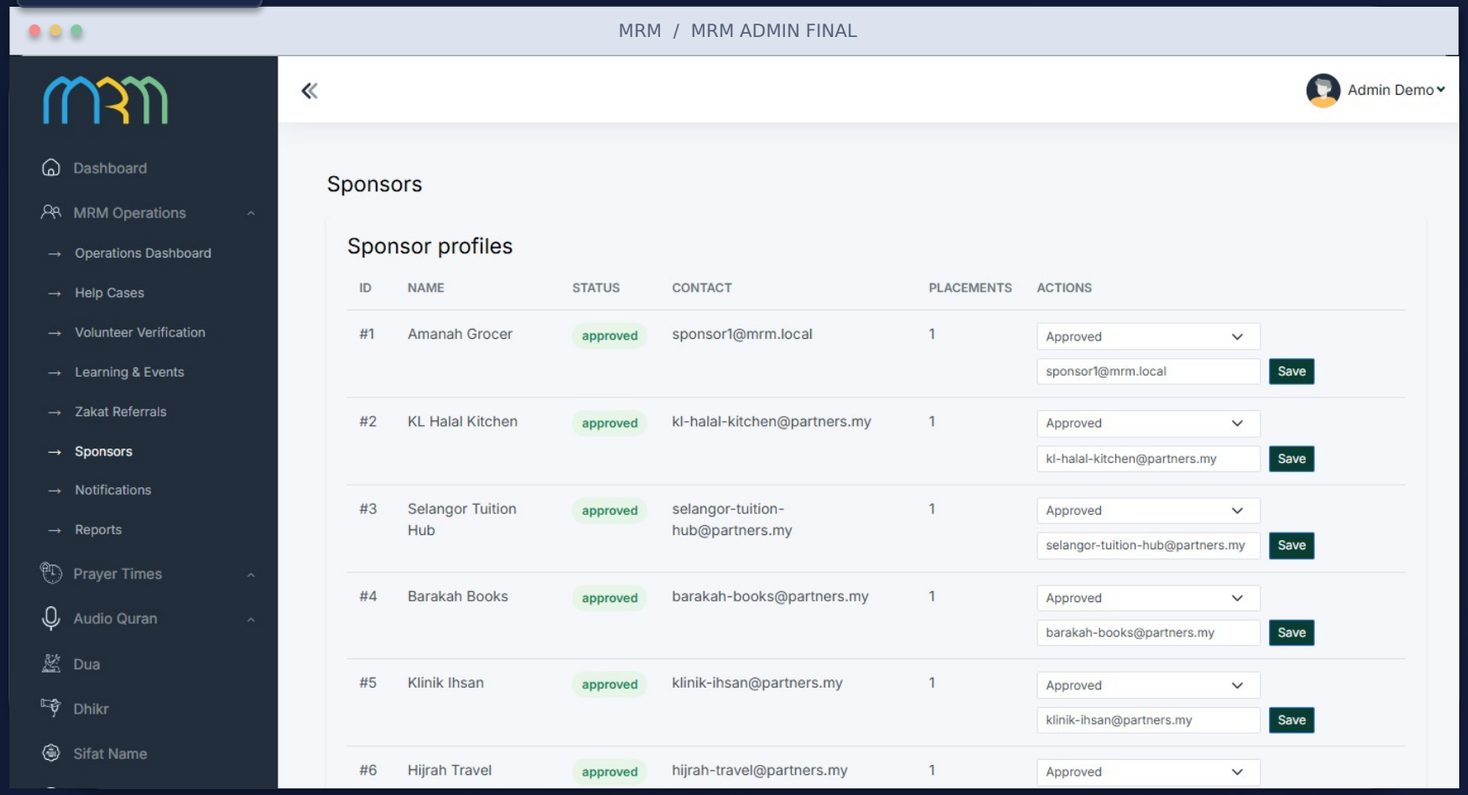

Reminders link to sessions; approved recordings support later learning. External meeting links may be used.

Teacher workspace [25] → MRM moderation [26] → programme → reminders [23] → learner access [24]

Sponsors: recognition with clear boundaries

Approved sponsor placements support MRM without influencing care, guidance or zakat decisions.

Reporting › 46

Provided demo capture · top viewport; full capture in screenbook

Approve sponsor assets

MRM confirms sponsor details, logos, creatives and destination links.

Schedule recognition

Set placement, start/end dates and publication state; identify sponsor material clearly.

Report responsibly

Aggregate views/clicks only. External marketing and launch publication remain MRM responsibilities.

Sponsor agreement → approved assets → time-limited placement → aggregate reporting [46]

The website opens the door to the platform

Public discovery supports all Muslims, prospective volunteers, teachers, partners and sponsors.

Discover MRM

Home, mission, programmes, approved resources and public contact information.

Participate

Support routes, volunteer information, teacher applications and app download links.

Learn & attend

Public classes, events and approved articles connected to platform content.

Trust & maintain

Policies, partner/sponsor information and staff-managed public content.

Public website → relevant service / app • Agreed public content migration; private records need assessment

Daily Islamic tools create everyday value

A complete utility set supports Muslims at different stages of knowledge and practice.

Prayer & direction

Prayer times, approved local adjustments, Qibla and nearby mosques.

Quran & learning

Quran reading, approved translations and recitation sources.

Remembrance

Dua, dhikr and hadith with approved religious references.

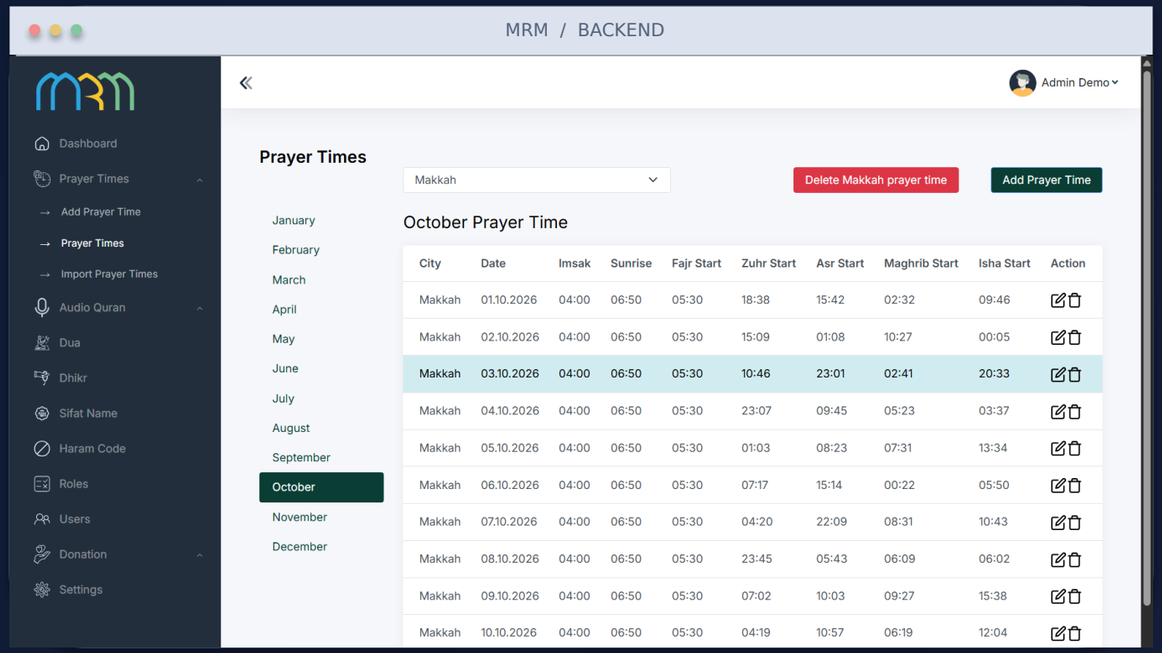

Dates & guidance

Hijri calendar, Ramadan schedule and informational zakat estimate.

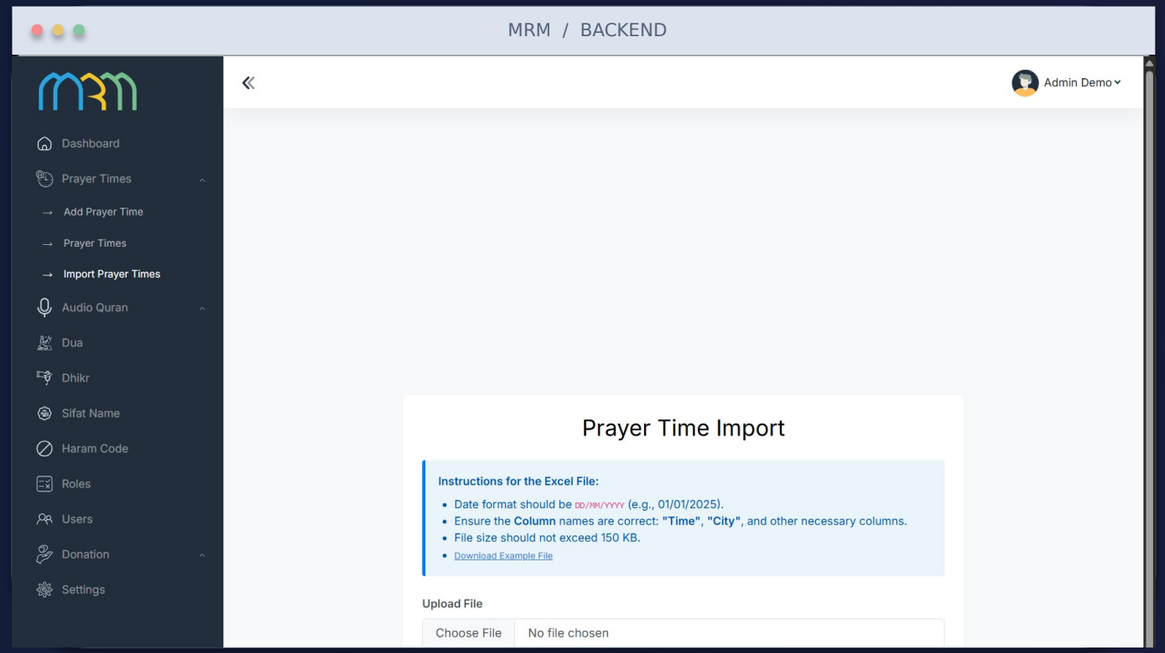

MRM approves religious references, translations, calculation methods, rights and local conventions.

Prayer times: local settings and controlled imports

Prayer schedules connect approved calculation conventions with location and user preferences.

Provided demo capture · top viewport; full capture in screenbook

Provided demo capture · top viewport; full capture in screenbook

Select area → use approved schedule / method → display prayer times → apply permitted adjustments

Import and source validation [41] → approved schedule → daily app experience [32]

Qibla and nearby mosques

Permission-aware direction and area discovery support practical daily use.

01

Choose location

Device permission or supported manual area input.

02

Find direction

Qibla uses device/location capability with calibration guidance.

03

Discover mosques

Approved places by area; review relevant details.

04

Continue learning

Connect to prayer guidance and approved programmes.

Clear device guidance

Handle denied permissions and sensor limitations without a misleading result.

Curated information

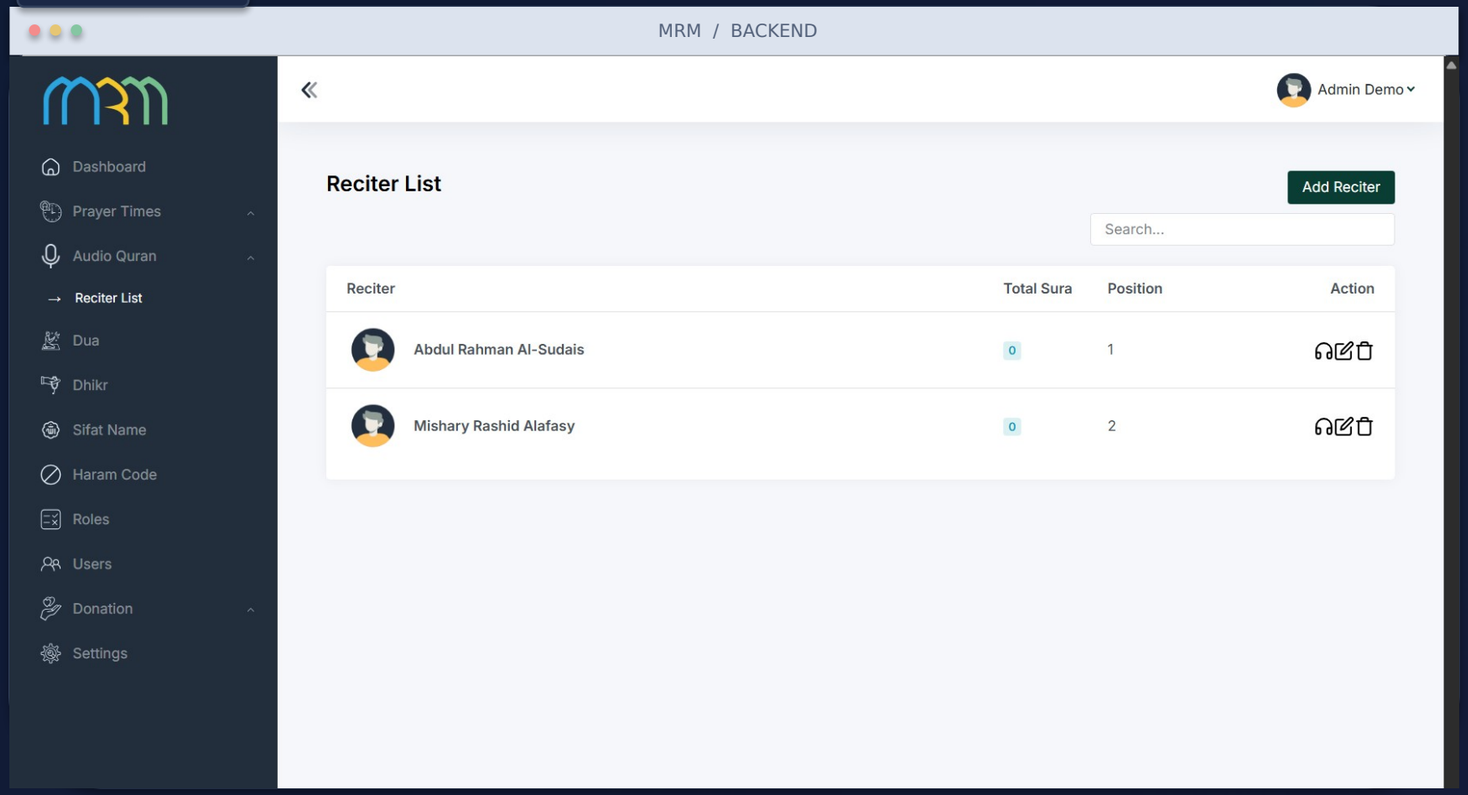

Confirm map provider, source accuracy and place data before release.

Location preferences [12] → prayer / Qibla / mosque discovery • Volunteer profiles remain separately restricted

Quran reading and recitation

Approved reading, translation and audio sources connect to daily learning.

Learning › 24

Provided demo capture · top viewport; full capture in screenbook

Read & understand

Quran text and approved translations must be checked against selected licensed sources.

Listen

Reciter and audio administration support approved recitation delivery.

Connect to learning

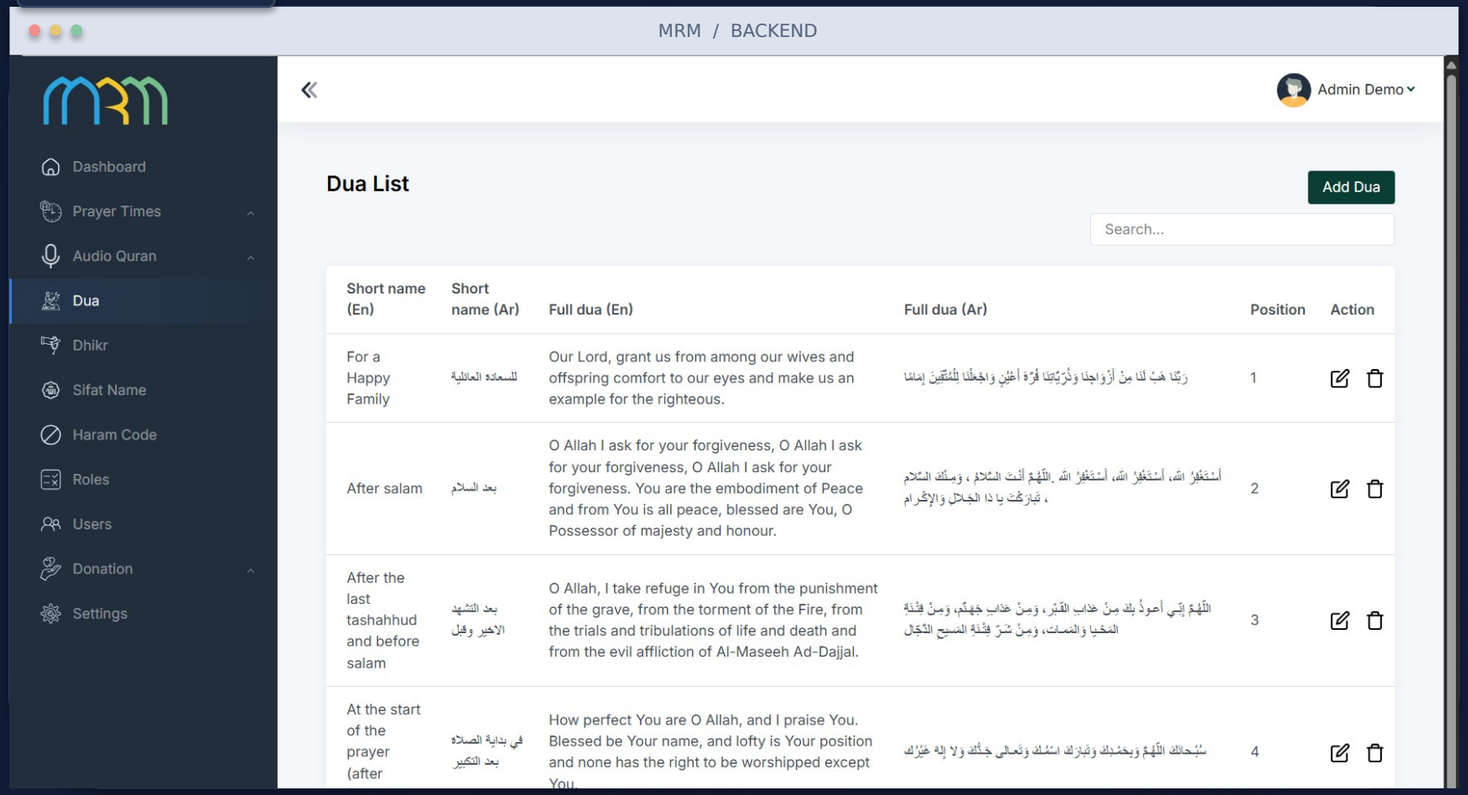

Relevant lessons and resources deepen understanding. Mobile reader captures were not supplied.

Approved Quran sources → reading / recitation → learning resources [24] • Technical reciter capture indexed [49]

Dua: discover approved supplications

Dua content is managed by category and published from reviewed references.

Categories › 41

Provided demo capture · top viewport; full capture in screenbook

Browse by need

Categories help users find relevant supplications.

Understand the content

Use approved Arabic, translation and reference data where available in the supplied component.

Maintain accuracy

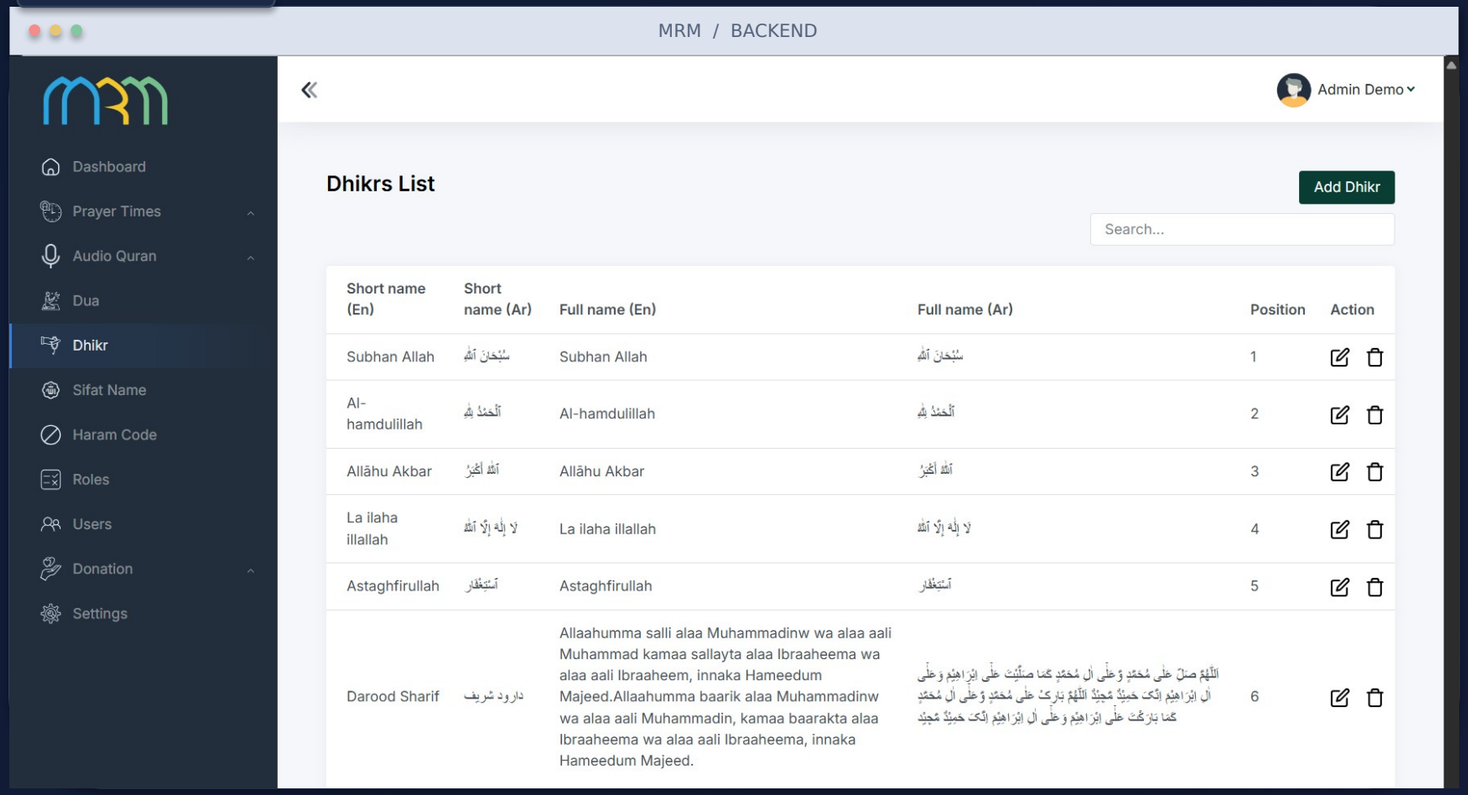

MRM reviews religious sources, edits and publication rights before use.

Content categories [41] → approved dua → daily practice • Learning links use approved content [24]

Dhikr: consistent remembrance content

The content library supports clear, approved guidance for daily remembrance.

Governance › 41

Provided demo capture · top viewport; full capture in screenbook

Find relevant dhikr

Reviewed entries and categories organise remembrance content.

Use approved wording

Religious text, translation and repetition guidance require MRM approval.

Stay consistent

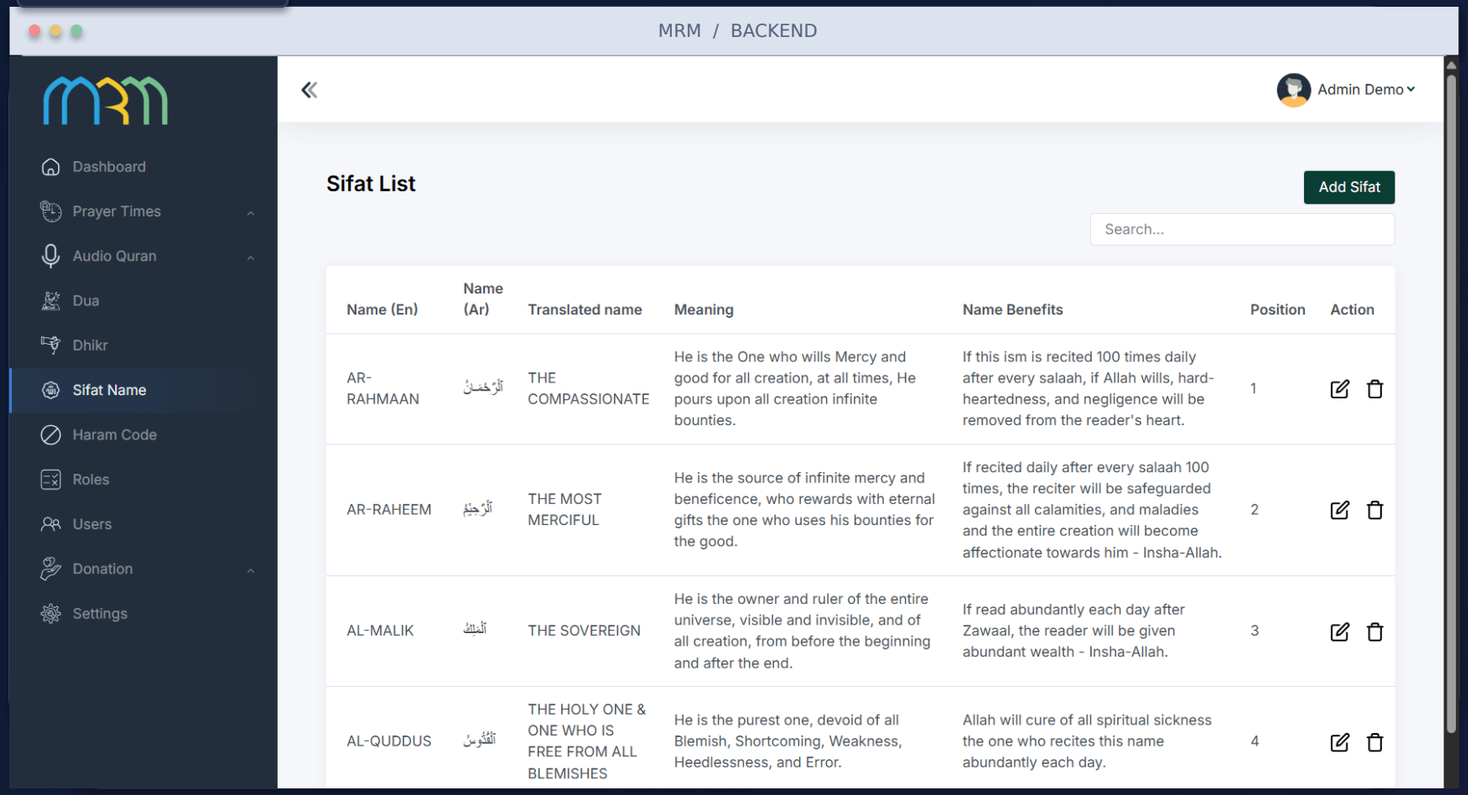

Template components and content governance maintain a coherent utility experience.

Approved dhikr library → daily practice → related learning [24] • No fabricated religious claims

Hadith and Sifat Names: trusted references

Hadith is in the proposed utility scope; the supplied template also includes Sifat Names administration.

Utility set › 32

Provided demo capture · top viewport; full capture in screenbook

Hadith content

Confirm approved sources, translations, licensing and the supplied component capability.

Sifat Names library

The provided administration screen shows a distinct existing template content function.

Separate evidence

This screenshot does not demonstrate a mobile hadith reader. Each source requires review before publication.

Religious source approval → content review [41] → appropriate daily tool [32]

Hijri dates and Ramadan guidance

Approved calendar conventions and local prayer schedules connect seasonal use to daily practice.

01

Choose convention

MRM-approved Hijri and local calendar settings.

02

View the date

Clear Hijri display with applicable local adjustment.

03

Plan Ramadan

Use approved local schedule and relevant learning.

04

Participate

Discover MRM classes and community events.

Local accuracy

Calendar and prayer-time conventions must be explicit and reviewed.

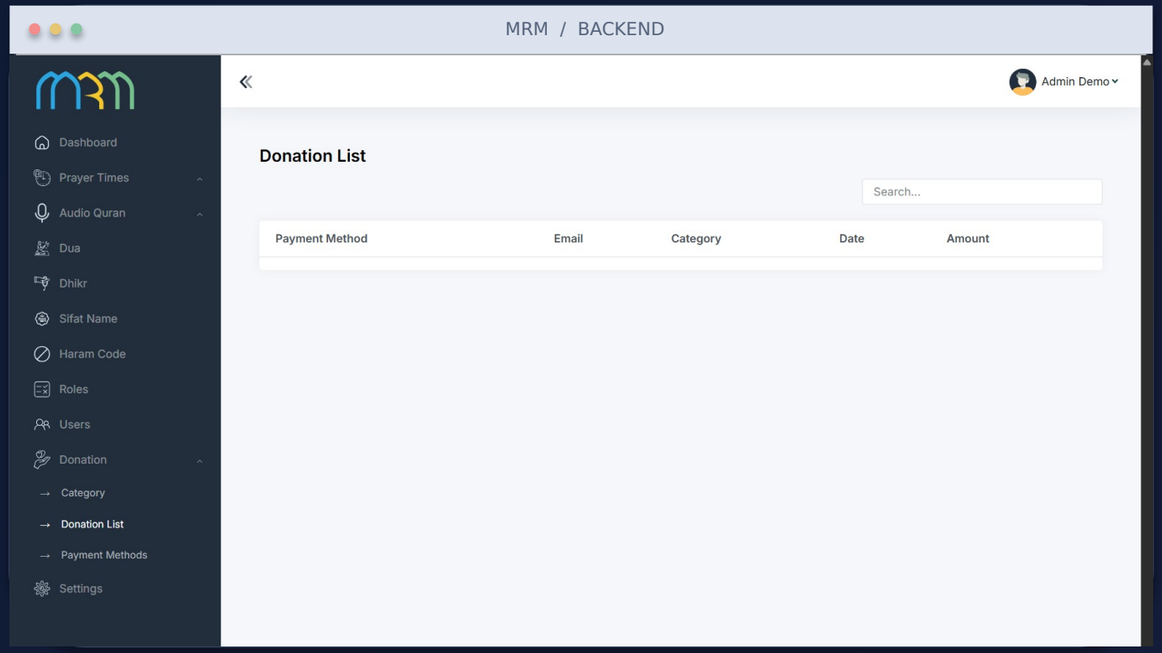

Relevant content

Connect seasonal guidance to approved programmes and resources.

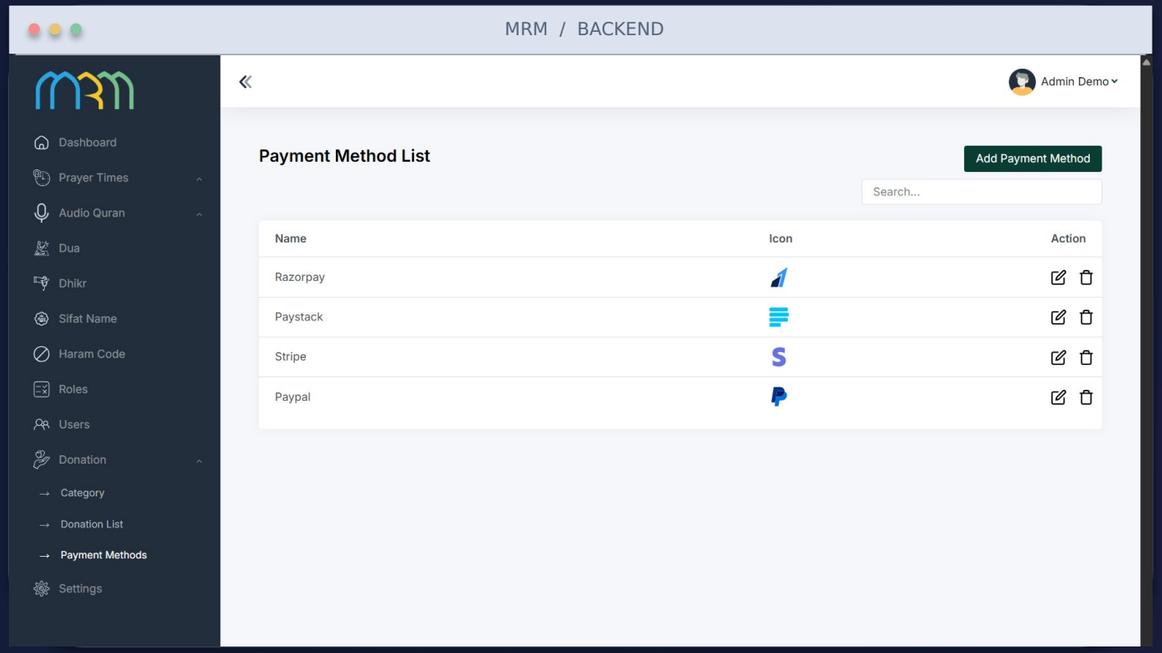

Approved calendar → Ramadan schedule → prayer settings [33] → learning/events [29]

Zakat estimate and payment boundaries

The utility estimate, assistance referral and existing template payment screens serve different purposes.

Provided demo capture · top viewport; full capture in screenbook

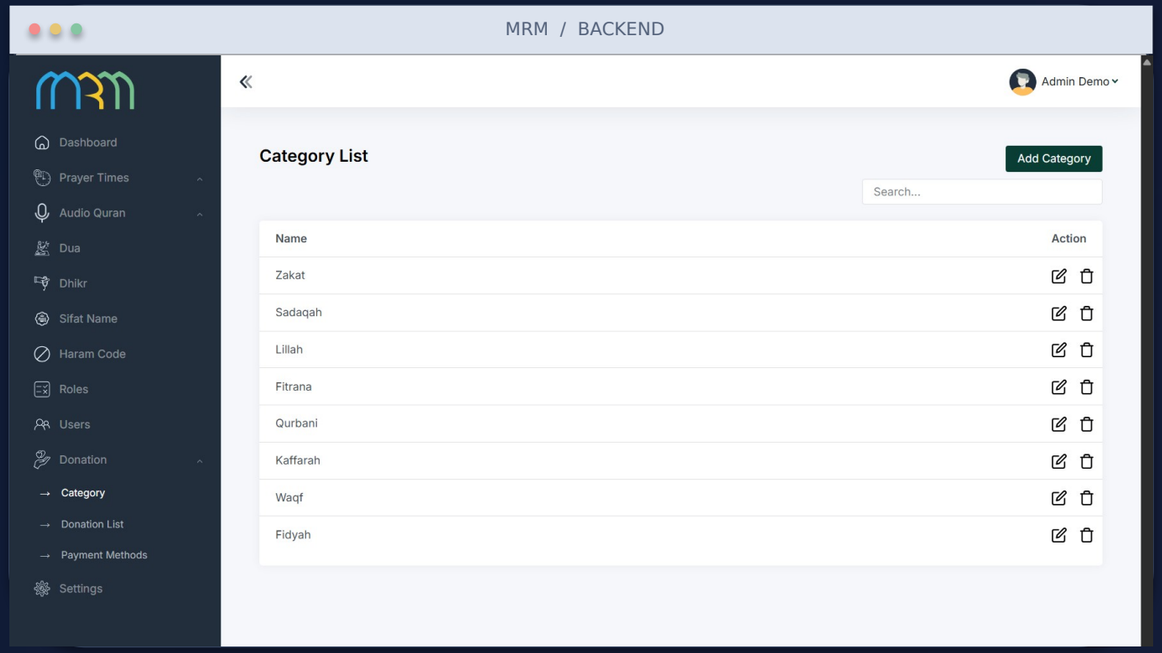

Provided demo capture · top viewport; full capture in screenbook

Zakat estimate = informational guidance. Zakat referral = staff coordination. Neither proves payment collection.

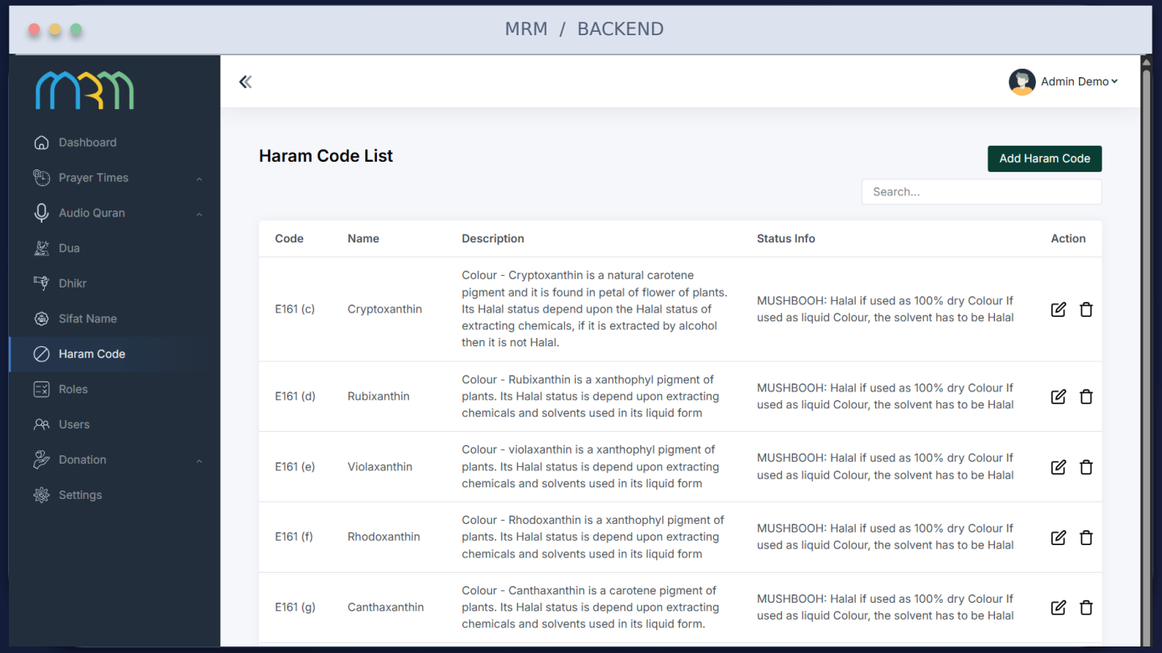

Donation/payment configuration is present in the template; it is not evidence of an approved live payment flow.

Content governance and template library

Categories and reviewed references connect administration to reliable published utilities.

Provided demo capture · top viewport; full capture in screenbook

Provided demo capture · top viewport; full capture in screenbook

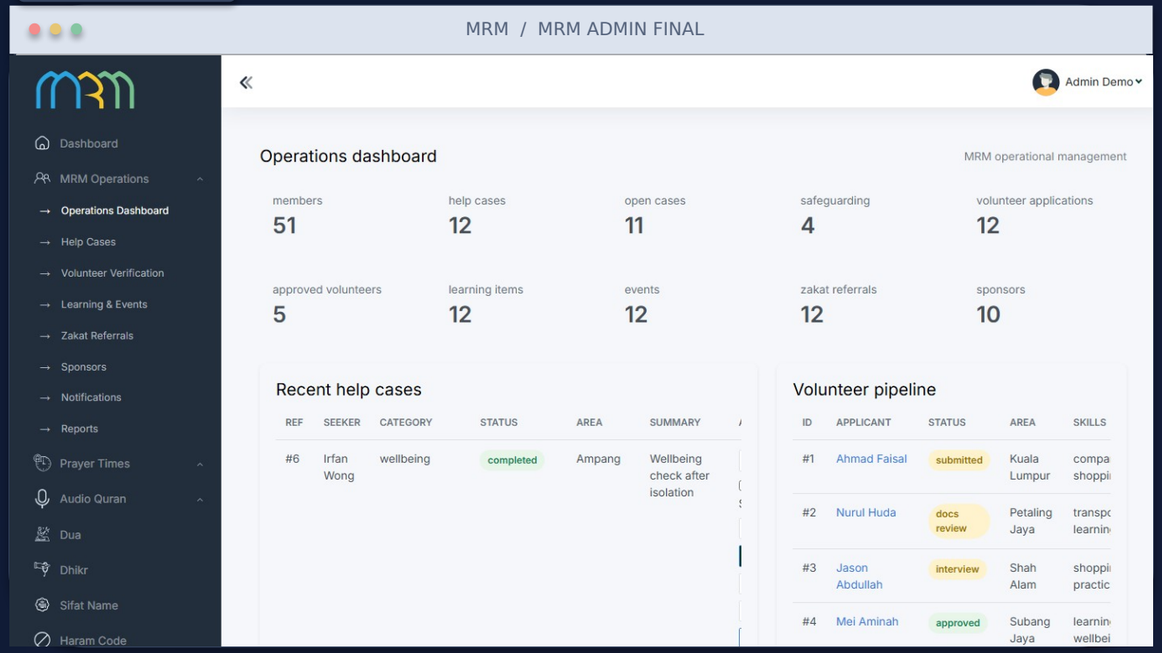

Source → rights and religious review → category → approved publication → correction / withdrawal

Haram Codes is a supplied template function; its public use and claims need explicit MRM review.

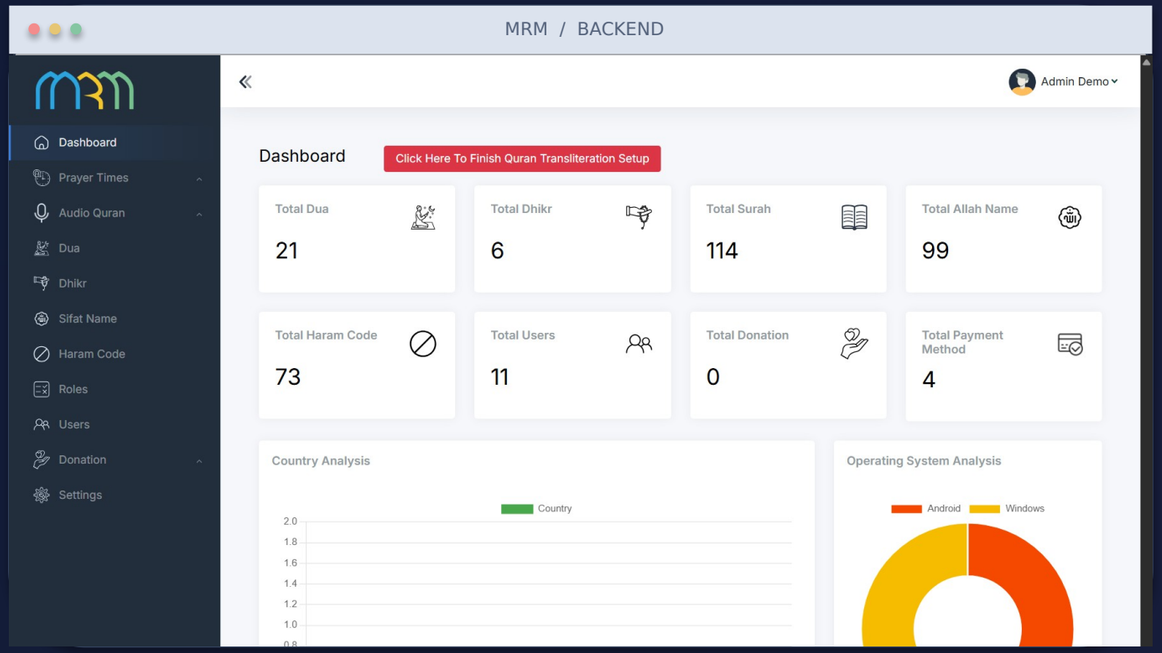

MRM dashboard: a coordinated operating centre

Operational queues connect care, verification, learning and sponsorship.

Reports › 46

Provided demo capture · top viewport; full capture in screenbook

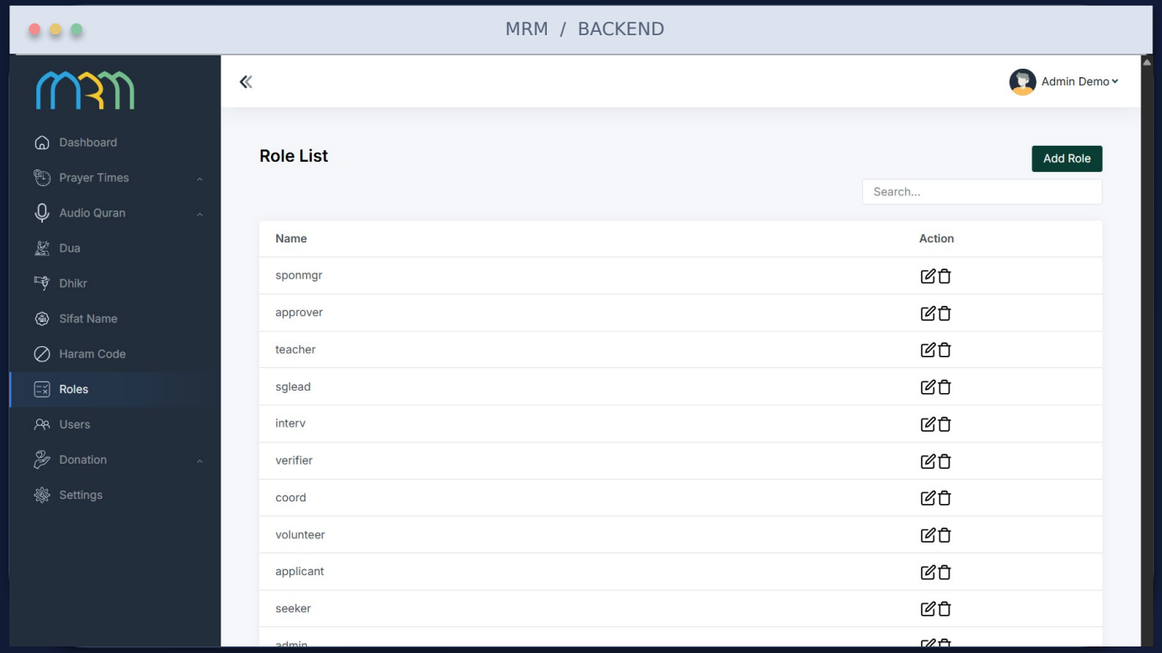

Provided demo capture · top viewport; full capture in screenbook

Review queues → authorised action → recorded outcome → operational reporting

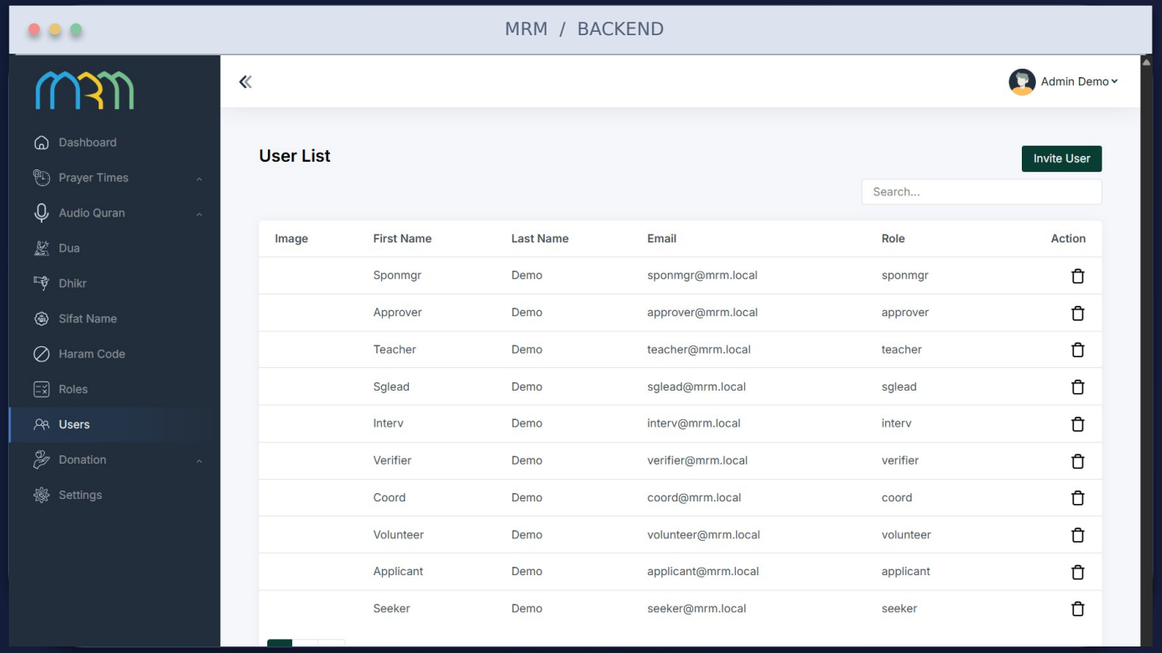

Supplied dashboard figures are demo evidence. Existing setup banners must be resolved before release.

Accounts, roles and restricted access

Role and record-level permissions control who can act and which information they receive.

Provided demo capture · top viewport; full capture in screenbook

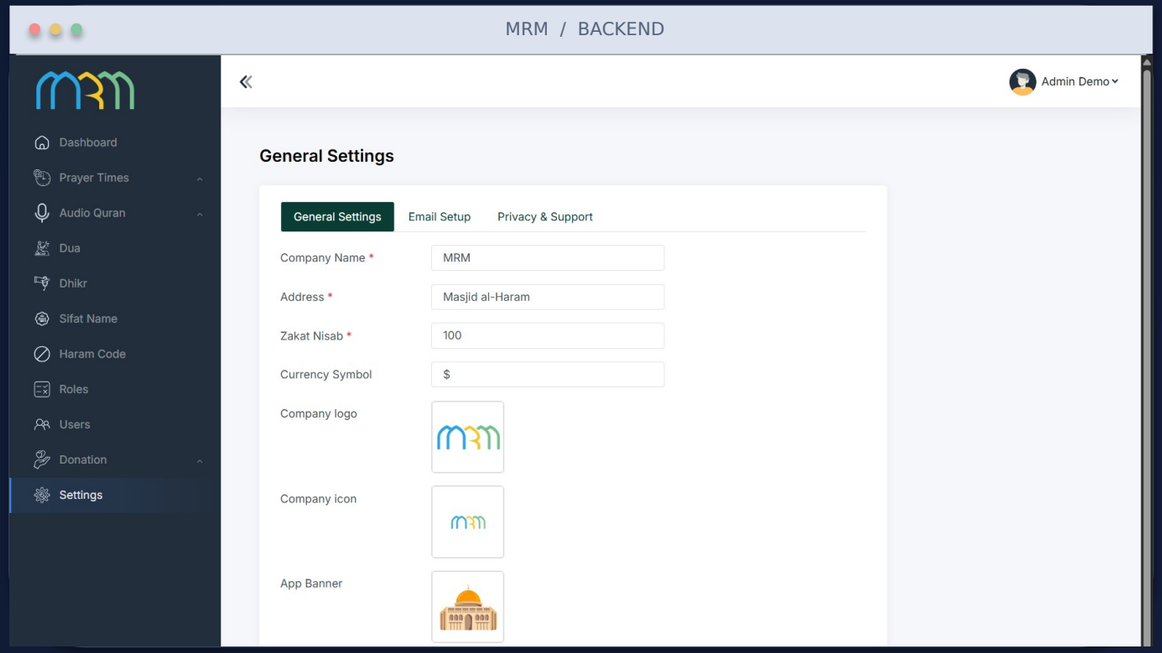

Provided demo capture · top viewport; full capture in screenbook

Member → own records | Volunteer → eligible/assigned work | Teacher → content | Staff → duty-based access

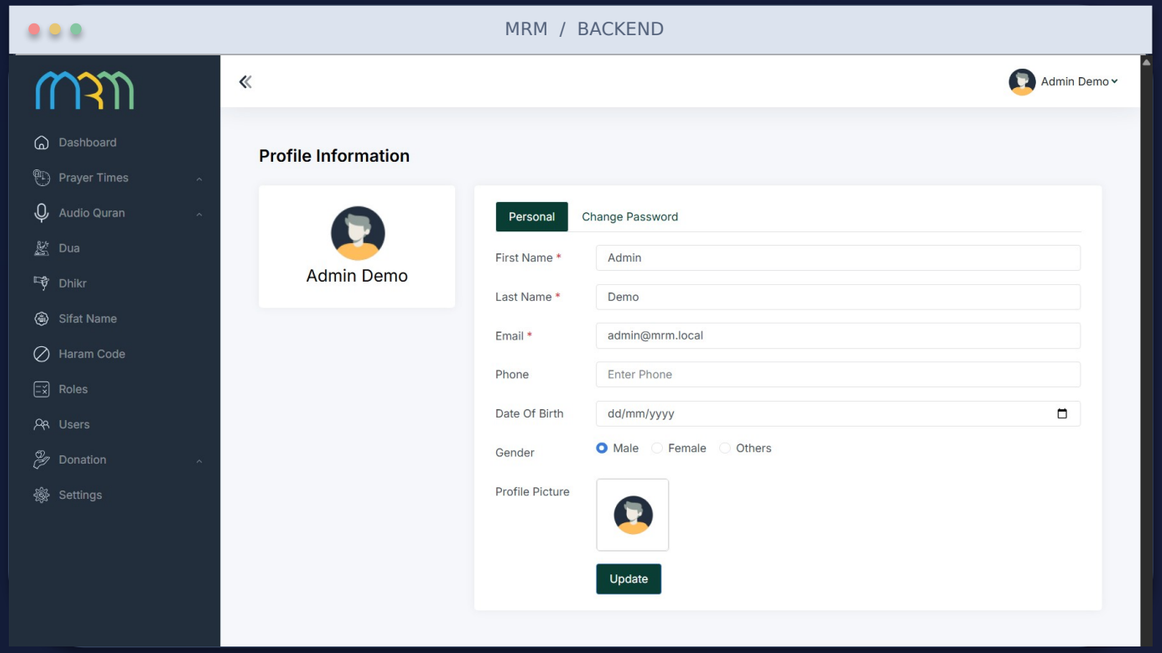

Gender boundaries [16] + confidential-case rules [18] + approved role + individual record permission

Configuration and administrator profiles

Settings and staff identity support consistent operation across the platform.

Provided demo capture · top viewport; full capture in screenbook

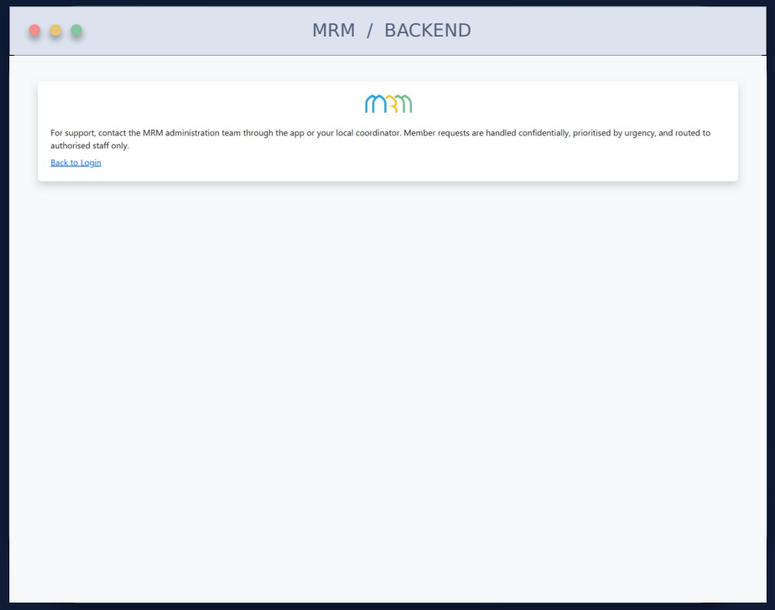

Provided demo capture · top viewport; full capture in screenbook

Approve configuration → restrict staff access → record sensitive changes → validate affected journeys

Brand assets, operational settings and staff responsibilities are configured without changing account permissions.

Support, privacy and terms

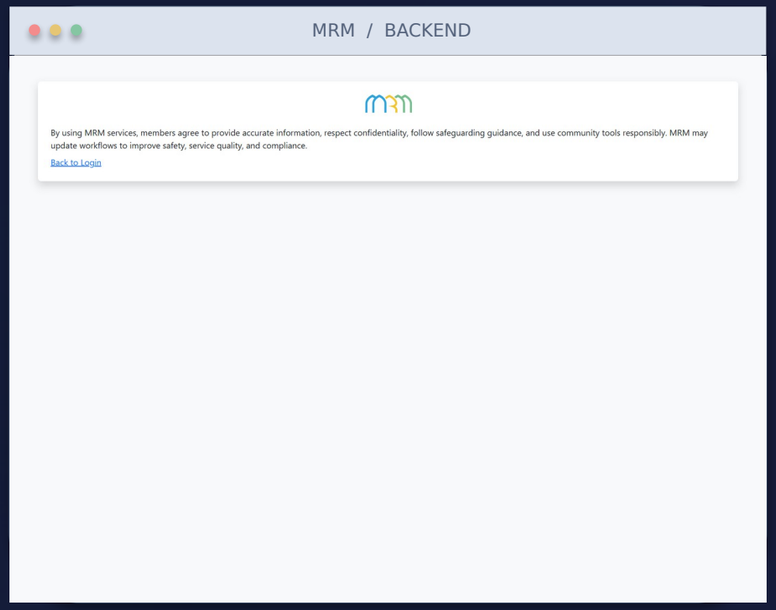

Public policy pages must reflect real service boundaries and approved handling of personal information.

Provided demo capture · top viewport; full capture in screenbook

Provided demo capture · top viewport; full capture in screenbook

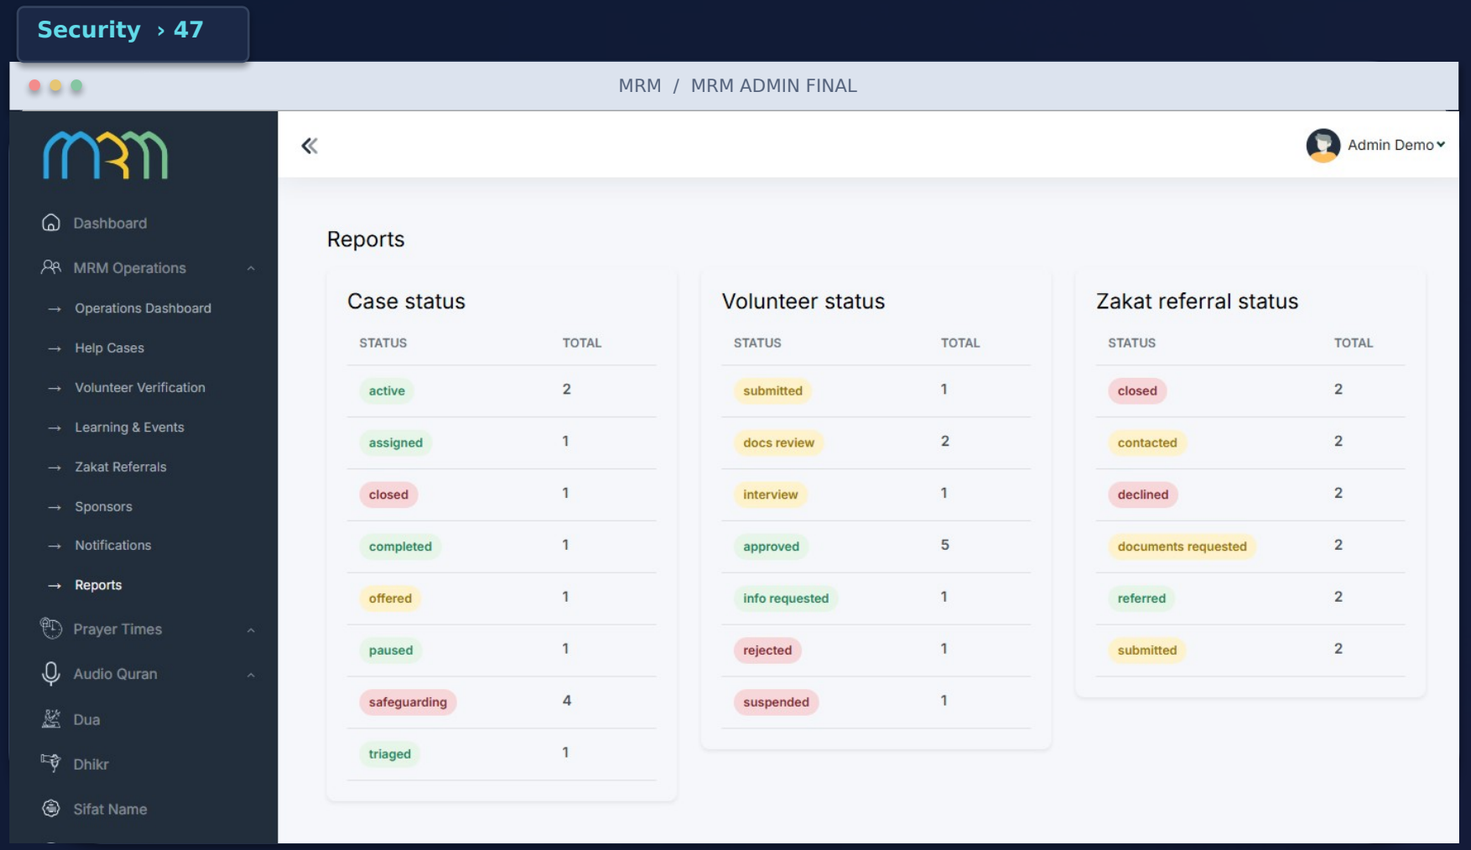

Provided demo capture · top viewport; full capture in screenbook

MRM supplies notices, retention decisions and support contacts; final pages replace template placeholder copy.

Privacy / consent [12] → restricted data [47] • Support and conduct reporting → designated MRM staff [19]

Reports: understand service without exposing people

Operational reporting connects case outcomes, volunteer capacity, referrals and programme activity.

Provided demo capture · top viewport; full capture in screenbook

Service oversight

Review request and referral status, open work and volunteer capacity.

Programme insights

Agreed learning participation, teacher activity and sponsor performance summaries.

Controlled export

Aggregate by default; identifiable exports require authorised duties and approved sharing.

Recorded service events → aggregated summaries → MRM action • Demo counts are not operational performance

Security is part of every connected flow

Permissions and data handling apply across the app, public website, administration and backend.

01

Authenticate

Verify identity and current authorised roles.

02

Authorise

Check role, record, gender and case sensitivity.

03

Protect

Encrypted transport and restricted verification files.

04

Record & recover

Audit sensitive actions; backup and retention controls.

Private data paths

Identity evidence, case details and location require separate access policies.

Real validation

Test direct API access, role changes, denied permissions and billing states.

Safe notifications [23] • Limited exports [46] • MRM policy + server controls + meaningful tests

Delivery: staged evidence over 3–4 months

The proposed schedule depends on required inputs, timely decisions and external service readiness.

01

Weeks 1–2

Source audit, journeys, policy matrix and acceptance checklist.

02

Weeks 3–5

Template-consistent design, foundation and roles.

03

Weeks 6–10

Care, volunteers, teachers, learning and subscriptions.

04

Weeks 11–13

Utilities, website, sponsors, notifications and reports.

05

Weeks 14–16

Security/device tests, UAT, training and submissions.

MRM dependencies

Policies, content rights, partner contacts and client-owned accounts.

Release qualification

Store submission is a milestone; approval dates remain store-controlled.

Review at each stage • Scope changes recorded • No silent removal of agreed modules

Screen coverage and evidence boundaries

All 38 primary captures are indexed; duplicate export variants are retained in the companion screenbook.

9 mobile captures

Home, services, activity, account and entry states. Some filenames do not match the captured screen.

20 backend captures

Content, prayer, accounts, settings, policies and template payment configuration.

9 MRM final captures

Cases, verification, assignments, learning, referrals, sponsors, alerts and reports. Demo records.

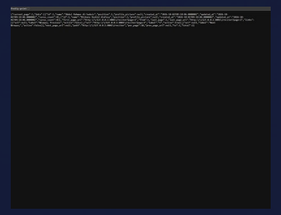

Captures requiring replacement or a fresh functional demonstration

Volunteer filename → Gmail

Assignment/learning → blank state

Reciters → raw API response

Missing mobile detail views are described as proposed flows; the deck does not fabricate completed screens.

Acceptance, handover and next steps

Confirm the detailed specification, validate the real journeys and release through MRM-owned accounts.

Confirm the specification

Final naming, permissions, plans, content sources, capacity and partner handoff. Preserve Zabi’s visual patterns.

Verify complete journeys

Requests, verification, restricted cases, referrals, learning, subscriptions and sponsor expiry.

Handover to MRM

Operating guide, staff training, deployment notes and acceptance checklist. Critical defects resolved before release.

Prepare client-owned releases

Android/iOS submissions, applicable store billing and account readiness. Proposal includes 30-day stabilisation.

Next step: detailed requirements and source audit → staged implementation → evidence-based acceptance
