The complete platform, connected

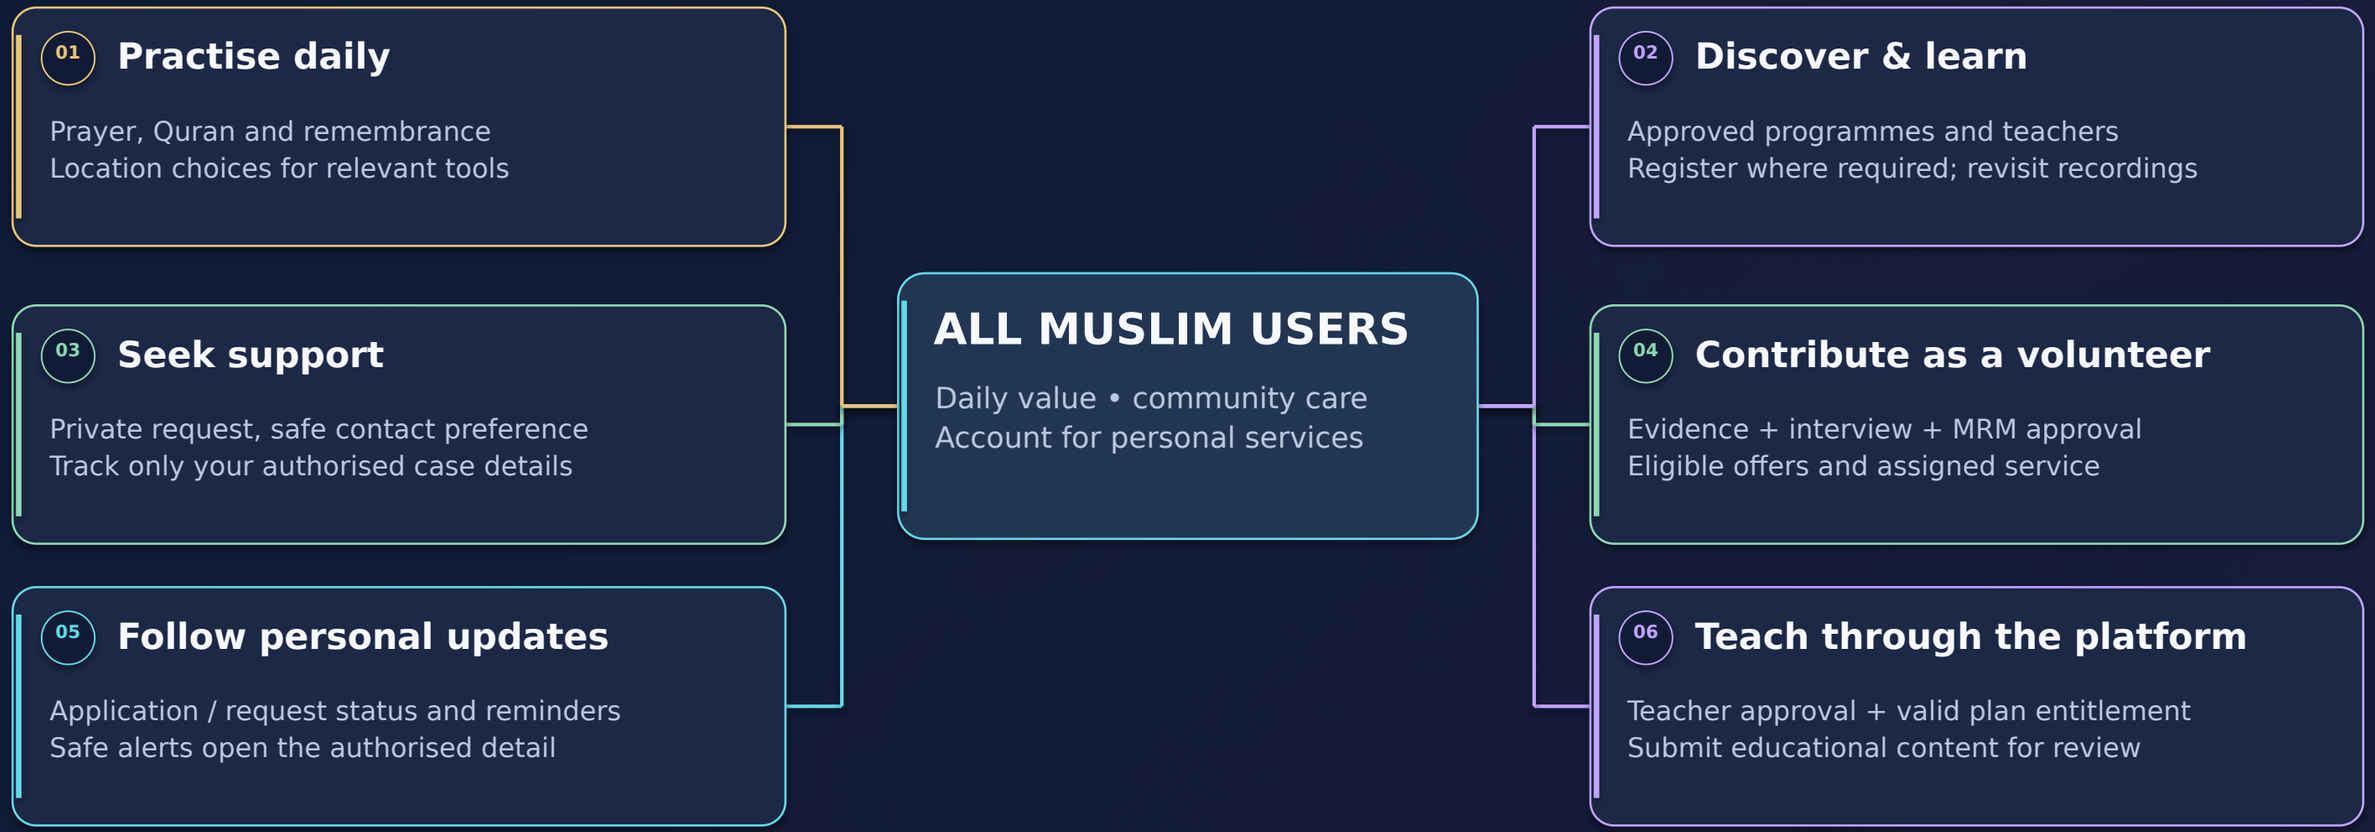

A mind map of daily practice, learning, community care and the services that make them work together.

Companion to the 58-page deck. Branch colours group features; detailed maps explain approvals and handoffs.

One Muslim user, many ways to participate

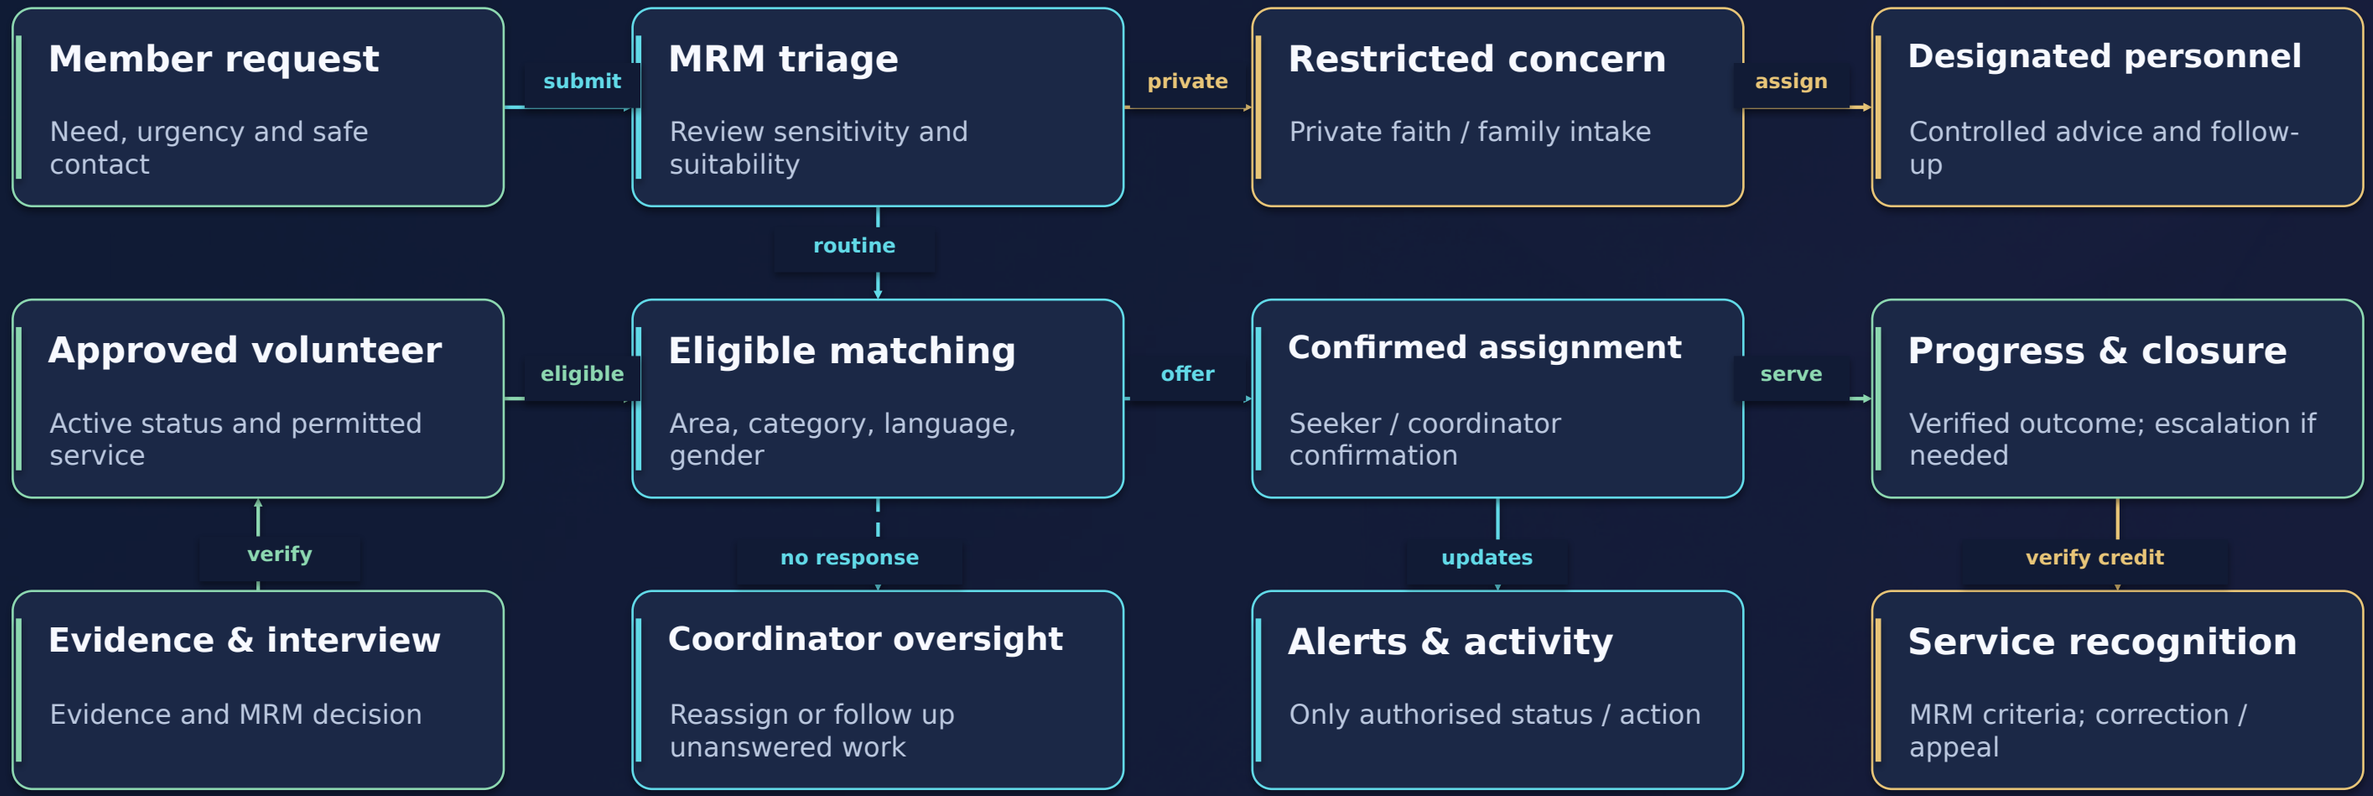

Daily tools welcome the wider community; personal services and privileged roles use the appropriate access checks.

Core member assistance and volunteer participation remain free. Teacher subscription privileges stay separate.

How care, volunteering and recognition connect

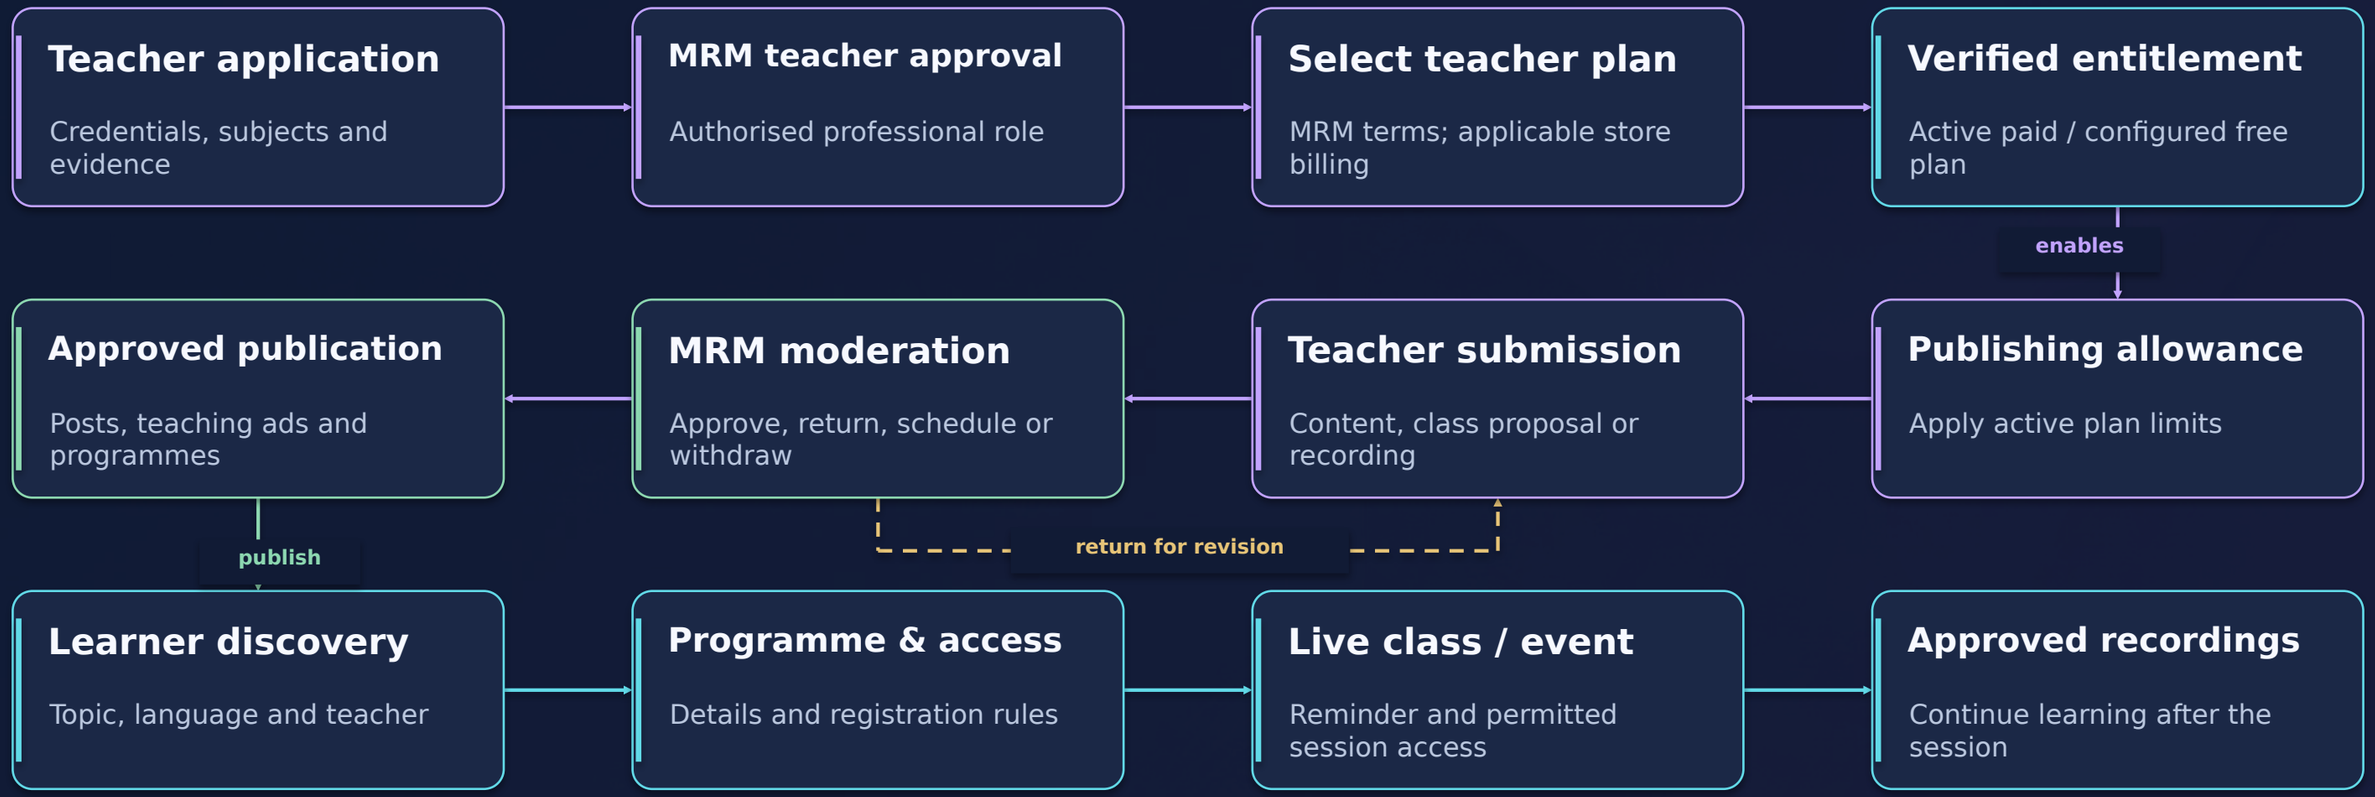

Routine assignments and restricted concerns follow distinct access paths, with MRM coordinating the outcome.

Approval gates access; assignment gates case detail. Rank never grants sensitive-case or administrator access.

From approved teacher to trusted learning

Teacher plans enable publishing allowances; MRM moderation controls what learners can actually see.

Payment does not approve content or grant staff access. Learners and volunteers do not need teacher subscriptions.

Daily utilities connect through approved inputs

Location, religious content and local conventions feed the right tools without mixing unrelated permissions.

INPUT / USER CHOICE	VALIDATION / CONFIGURATION	CONNECTED EXPERIENCE
Location or manual area Consent and device capability	**Local prayer & map settings** Local times, direction and place sources	**Prayer • Qibla • nearby mosques** Useful daily guidance; permission handling
Religious sources & rights Approved references and translations	**Reviewed content library** Quran text / recitation and utility content	**Quran • dua • dhikr • hadith** Connect practice to approved learning
Calendar / zakat sources MRM-approved local conventions	**Display & calculation rules** Source review; local adjustment policy	**Hijri • Ramadan • zakat estimate** Guidance only; referral is a separate service

Daily content ↔ approved learning. Zakat estimate ↔ referral information; eligibility stays with the authority.

Confidential support and zakat: controlled handoffs

These journeys share access controls and case accountability, not unrestricted volunteer or teacher visibility.

CONSENT + MINIMUM NECESSARY DATA

ROLE + RECORD-LEVEL AUTHORISATION

SAFE ALERTS + RESTRICTED EVIDENCE + AUDIT

CONFIDENTIAL FAITH / FAMILY SUPPORT

Private concern

Safe contact and permitted information

→

Designated MRM review

Private queue and appropriate assignment

→

Authorised guidance & follow-up

Controlled closure or permitted referral

ZAKAT ENQUIRY / REFERRAL

Enquiry + referral consent

Need, region and safe contact preference

→

MRM completeness review

Approved forms, sharing method and contact

→

Zakat authority handoff

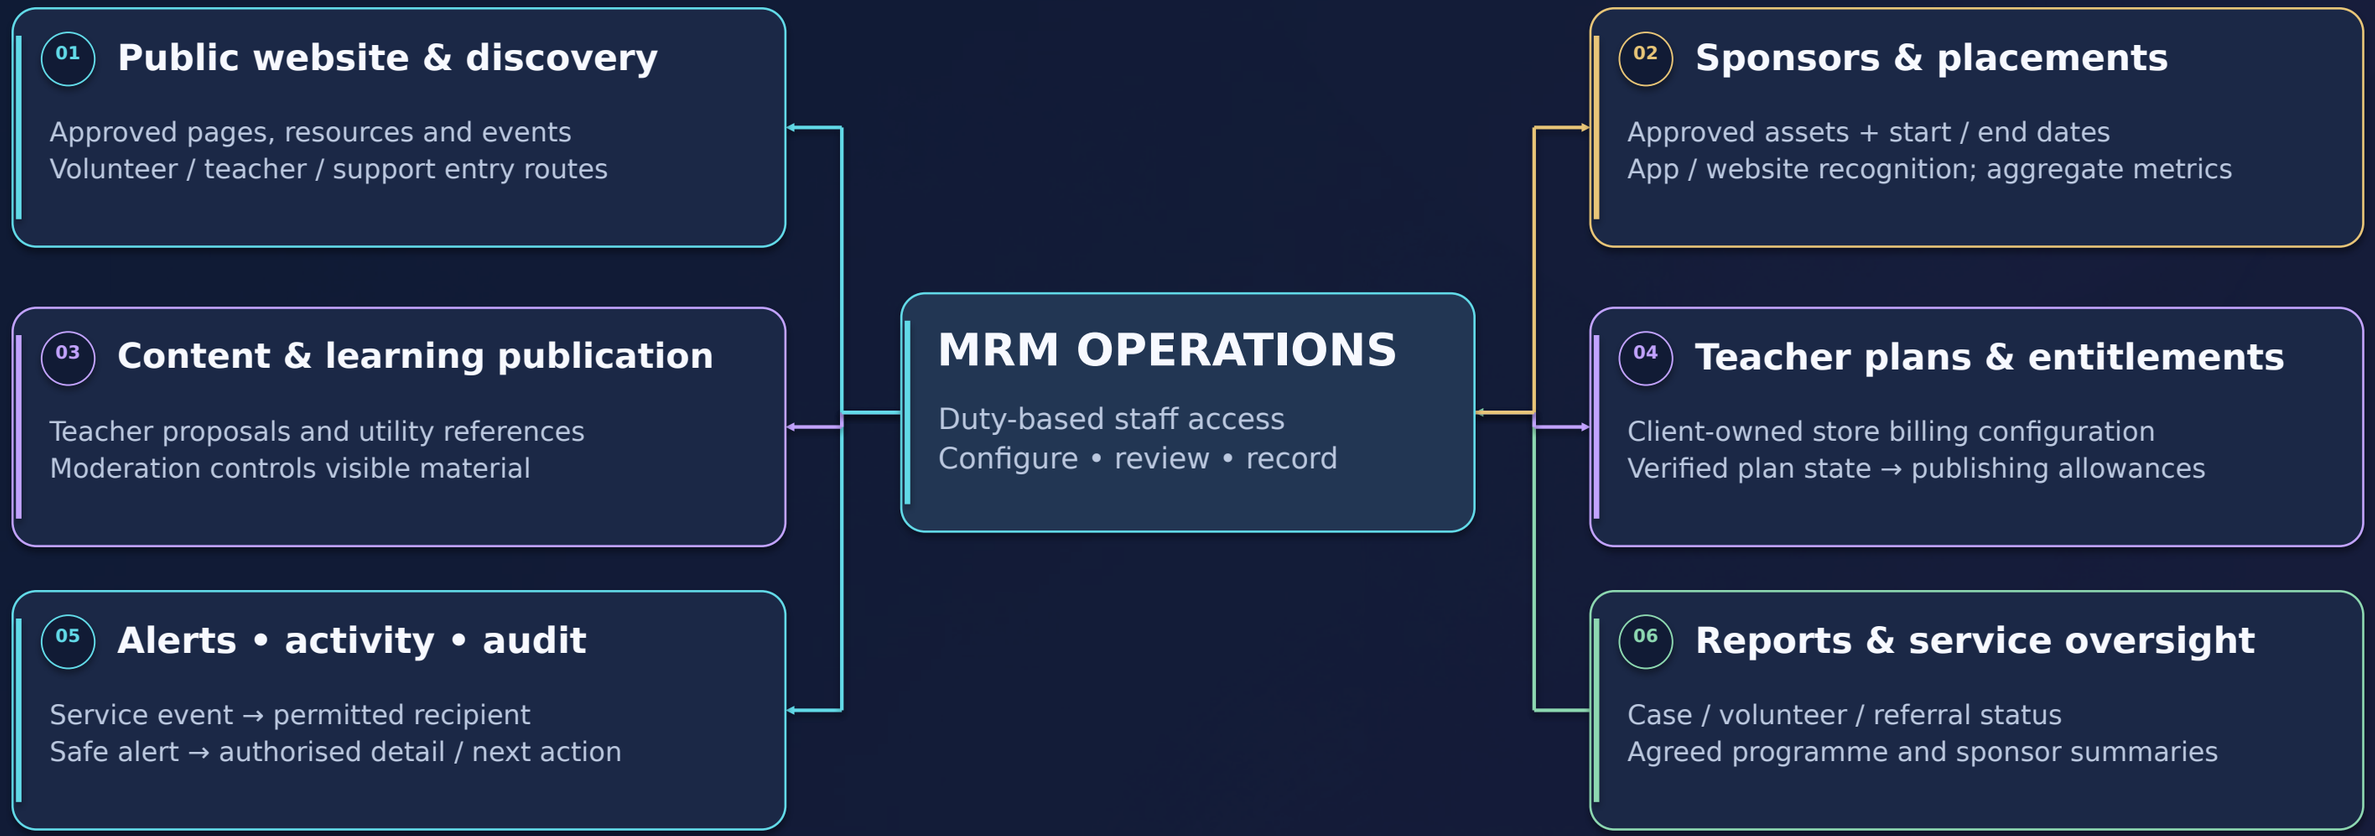

Authority decides eligibility and disbursement

Authorised status → case history → permitted user update → aggregate reporting. Partner API access is conditional.

No automated religious judgement. No guaranteed partner API. No zakat collection or disbursement in the proposal.

MRM operations connect content, revenue and oversight

Staff actions create controlled outputs across the app and website; service records feed aggregate reporting.

Sponsors cannot access private cases. Sponsorship never changes assignment, confidential guidance or zakat decisions.

Connection index: what links to what

Use this index to trace a feature dependency back to the detailed scope pages in the full presentation.

FEATURE	CONNECTS TO	CONNECTION PURPOSE	ACCESS / POLICY CHECK	PAGE
Accounts & roles	Personal records / staff tools	Authorises appropriate access	Role + record + gender / sensitivity	43
Volunteer verification	Discovery / request matching	Enables eligible service	Approved and active only	15
Triage & matching	Assignment / case progress	Offers, confirms and follows up	Sensitive route stays restricted	13
Teacher approval + plan	Posts / ads / programme proposals	Enables publishing allowances	Valid entitlement; no staff access	27
MRM moderation	Learning / website / utility content	Approves visible material	Religious review and content rights	26
Service events	Alerts / activity / case detail	Prompts the permitted next action	Privacy-safe alert; authorise detail	23
Zakat enquiry	Authority referral / follow-up	Coordinates approved handoff	Consent; authority decides outcome	20
Verified service outcome	Badges / ranks / service history	Awards evidence-based credit	MRM criteria; access unchanged	21
Sponsor configuration	App / website placements	Schedules recognition / expiry	Approved assets; aggregate metrics	30
Recorded outcomes	Operational reports / staff review	Aggregates service information	Restricted identifiable exports	46

Solid arrows = directed relationship / handoff. Dashed arrows = conditional path or revision feedback.
